ARDON® ^{ΛiM} HIGH®

Here at ARDON® we see sustainability as a way to continuously improve all our processes in order to minimise our possible adverse impact on the environment and society. We build sustainability on the quality, durability, timeless design and technological development of the materials we use in our products, as well as social responsibility. All our processes are regularly critically evaluated and innovated and we are constantly looking for newer and more sustainable ways.

ECOVADIS

We have been awarded a bronze medal by EcoVadis, an international authority in sustainability assessment. The EcoVadis rating tracks the sustainability management system across four areas: environment, labour and human rights, ethics and sustainable

purchasing.

It is based on 21 criteria that are adapted to the size, sector and regional presence of the company and takes into account not only the principles adopted, but also specific actions and results achieved.

This year we improved, moving up to 61 points and the 67th percentile. This puts us in the top 33% of companies in the global EcoVadis ranking. Compared to the previous assessment, when we were rated Committed, we've moved up to medal list - despite increasing demands and strong competition. The bronze medal from EcoVadis is proof that we are on the right track. We are succeeding in systematically strengthening our internal processes while improving the process of setting up and managing sustainability throughout the supply chain. At the same time, it is a reminder of the importance of continuing in our efforts, being able to stand up to the growing competition and defending our medal next year.

OEKO TEX STANDARD 100

Our mission is to protect users and to show respect for the environment,

which is why we test most of our clothing and glove collections according to the OEKO-TEX® Standard 100, which guarantees the absence of harmful substances including heavy metals, allergens, pesticides, formaldehyde and per- and polyfluorinated substances (PFAS), which are in the spotlight today due to their persistence in the environment and their adverse impact on human health.

Standard 100 is an internationally recognised chemical product safety certification that regularly updates its test limits based on the latest scientific findings. Among other things, it includes specific requirements for the control of dyes, plasticizers, preservatives and anti-mould agents - often to a more stringent degree than is required by the legal standards. This certification gives us confidence that ARDON® products are safe for end users and the environment throughout their entire life cycle.

GLOBAL RECYCLED STANDARD

We hold the Global Recycled Standard certification, which not only evaluates the use

of recycled materials in ARDON® products, but also rigorously monitors social and environmental responsibility in the supply chain. This standard requires respect for ethical working conditions, the provision of a safe and healthy working environment and the protection of human rights. At the same time, it focuses on environmental sustainability - the emphasis is on efficient resource management, minimising waste and the careful handling of chemicals.

The OEKO-TEX® Standard 100 and GRS certifications are reassessed annually by independent certification bodies to verify that our products and processes meet the current requirements of these standards. We take consistent pride in meeting these requirements and actively adapt our internal processes to ensure that we are always prepared to withstand an independent audit.

ENVIRONMENT

As part of our commitment to reducing our adverse environmental impact, we take specific measures across our operations. We have measured our carbon footprint in terms of direct and indirect emissions and emissions from entire value chain.

We pay great attention to waste management. In 2024, we handed over 99% of paper waste from our warehouse to be recycled. We compress paper and plastic into bales, reducing the collection frequency and cutting costs. We compost our biological waste and use it as a natural fertilizer for the plants around the warehouse. The leftover fabrics from our sewing workshop are given to a company that uses them to make punching bags. Damaged pallets are not thrown away, but are repaired and returned to circulation.

We design our packaging to be easily recyclable. We do not use PVC, lacquer or lamination. Plastic packaging is now only made of LDPE with a minimum of 35% recycled content. All cardboard boxes used to package products in our automated warehouse are glued with natural adhesive and

come from responsibly managed forests - they are FSC certified, as is our catalogue and all the paper we use in our offices. We use only black and white water-based inks for printing. We have completely eliminated the use of disposable cardboard boxes in our intralogistics and replaced them with reusable plastic boxes, which has saved us almost 4 tonnes of paper so far.

We also save energy and water - we use smart LED lighting, have optimised the size of our loading gates, and have reduced the temperature of the water in our boilers. By installing filters for tap water, we have eliminated the need to use disposable plastic bottles. All our employees are trained in waste separation and energy, water and material conservation.

SOCIAL

We care about people - whether it's our employees, our suppliers or the communities in which we operate. We strive to create a fair, safe and welcoming environment for all those associated with us.

We provide our employees with extra leave, flexible working hours, a meal allowance and refreshments at the workplace. We organise regular company events for employees and their families. Employee safety is a priority for us. We use ergonomic work tools and equipment to minimise the risk of harm resulting from poor posture and strain on the musculoskeletal system. This has minimised the number of work-related injuries.

We collaborate with sheltered workshops for people with disabilities, who pack gloves into dispensing machines for us. We believe that the involvement of everyone without distinction brings added value to the company and society.

We also care about the conditions of our suppliers - we require social audits such as SMETA, BSCI, SA 8000 and similar to ensure that our products are not produced using child labour or in undignified working conditions. We regularly visit production sites, especially in Asia, and check the situation on site.

We actively sponsor a number of sporting, cultural and charity events in our region and beyond. We have implemented 'Craft is Cool', a project designed to promote manual craft work and motivate the young generation to choose this career path and increase awareness of the value of traditional crafts.

GOVERNANCE

We have implemented solid principles of ethical behaviour that are fundamental for us. This policy emphasises our zero tolerance for corruption and any form of unethical conduct. We believe that integrity and transparency are the foundation for building trust in the eyes of our customers and business partners.

One of the key elements of this policy is our publicly available whistleblowing system. This system provides a secure way for our employees and external partners to report any breaches of our internal policies or the law, allowing potential issues to be dealt with quickly and efficiently.

Our suppliers are contractually obliged to adhere to a Code of Conduct that sets out rules for all three areas of sustainability, i.e. their approach to environmental protection, working conditions for employees and good corporate governance, including anti-corruption policy.

We believe that true success is not just measured by numbers, but also by the mark we make - on the people we work with and the world we live in.

DESIGN

The exclusive design of ARDON® clothing collections.

Each ARDON® piece of clothing has its own original line that characterises it and is manufactured down to the smallest individual detail. Our high-quality designs are made with convenience and comfort in mind. ARDON® uses its own colour schemes that allow users to combine the products across the entire range. REFIWAN®, CREATRON®, 4xstretch®, CREATRON®CAMO, URBAN+, NEON, SUMMER, SIGNAL+, PROHEATECT, VISION, R8ED+®, 4TECH, COOL TREND, COOL TREND REFLEX and FLORET are all registered industrial designs.

RESEARCH & PROGRESS

ARDON® develops its own materials.

For ARDON® clothing, we develop special materials with unique properties that meet legal standards for workwear and professional clothing. The specific requirements for clothing are translated into the materials we use so that their optimum properties provide excellent performance for the clothing. We place great emphasis on abrasion resistance, tear resistance, colour fastness, functionality and breathability of our materials. We use special fabrics in our production:

ADN®TEQTICORE
REFIWAN®Fibre
TABIFLEX®
ARDON®BREEFFIDRY
ARDON®OPTIFLANNELS
ARDON®SOFTFLEECE
AMALYTTON
ElasticTECH active
ElasticTECH flexi
ElasticTECH prime
NYPAXX
ADN®TOPLYRON
ADN®AGPUREX
ADN®AKREC
ADN®BRILANTEX
ADN®Polygoflex
ADN®Polygoflex Light

3D SILHOUETTE

The ergonomically shaped cuts of ARDON® clothing follow the natural shape of the body and provide all ARDON® products bearing the 3D SILHOUETTE logo excellent silhouette properties. By respecting the anatomy of the human body, the clothing adapts perfectly to movement without making the user feel any restraint and is characterised by high wearing comfort even in difficult working environments.

OPTIFANNELS®

This special combed cotton has excellent tensile and abrasion strength, while still retaining softness. It provides great moisture absorption, fast drying and excellent insulating properties. Breathability and moisture-wicking ability allows use even under more intense physical activity.

Maximally flexible functional fabric with high added value. Despite its relative subtlety, the material is characterised by high resistance to abrasion and wear. Elasticity in four directions guarantees maximum freedom of movement. Another benefit of this sophisticated, quick-drying fabric is its excellent breathability, colour fastness and wrinkle resistance.

nypaXX®

Light and warm multi-layer material with the original hand-stitched NYPAXX®Contour pattern offers an optimal balance between comfort, design and function; it is extremely strong, quick-drying and abrasion-resistant.

The three-layer functional membrane softshell is designed for more demanding climatic conditions. It combines optimal levels of breathability and waterproofness along with 100% wind protection. The material will keep the user dry and comfortable in any weather condition.

ADN® Polygoflex

Highly functional and breathable material, quick to dry, very comfortable and soft.

ADN® Polygoflex Light

Highly functional, lighter-weight and breathable material, quick to dry, very comfortable and soft.

ADN® TEOTICORE

Specially woven material in a canvas weave for high strength, abrasion resistance and durability.

ElasticTech® PRIME

This high-quality twill weave softshell is highly durable and lightweight. It does not crease and is as supple as possible. The functional membrane provides added protection against water and wind while staying breathable.

ElasticTech® ACTIVE

Lightweight, soft, highly comfortable material combining the optimal combination of wind protection, water repellency and maximum breathability. This special non-membrane type of softshell is more lightweight for maximum comfort.

SOFTFLEECE®

A very pleasant, soft, warm and breathable functional material. Has excellent thermal insulation properties, wicks away moisture well, dries quickly, is resistant to abrasion and the wind, and ensures its functionality even under more demanding climatic conditions. Allows comfortable movement thanks to its elasticity.

CORDURA® F A B R I C

High-quality, resistant fabric made of polyamide fibres, characterised by maximum strength and resistance to mechanical wear, especially abrasion. The fibre structure and special weaving method ensures that Cordura products are several times more durable compared to traditional polyamide.

AMALYTTON®

The specially designed stretch cotton fabric is characterised by exceptional technical qualities. Provides increased strength and resistance while maintaining elasticity. Effectively wicks away moisture. The lightness and breathability of the natural material provides a pleasant wearing experience.

ADN® TOPLYRON

The fabric is of the highest quality, does not wrinkle, retains its shape and is pleasant to the touch. Thanks to the ability to repel dust particles, the material does not electrify, is breathable and quick-drying.

ADN® agpurex

A soft, pleasant to the touch fabric, comfort is guaranteed by the ability to absorb moisture, the material has high elasticity with memory capacity.

REFILIAN® fibre

A material with antistatic fiber and the majority of cotton is lightweight, breathable, has excellent strength, and complies with EN ISO 13688, EN ISO 1149-5, and EN 61340-5-1, suitable for industrial washing.

ADN® AKREC

A special fabric that, thanks to its unique fiber structure and carbon fiber admixture, effectively wicks away moisture from the body to the surface. The material developed for the production of luxury functional underwear is popular especially for its breathability, lightness and elasticity. The quick-drying material is characterized by softness, does not irritate the skin, is pleasant to wear and suitable for demanding activities.

BREEFFIDRY®

The highly functional and quick-drying material provides wind resistance, breathability and wicks away moisture, which users will appreciate when engaging in physical activities. The material is lightweight, colourfast, comfortable and wrinkle resistant. Thanks to its elasticity, it adapts perfectly to movement, which ensures complete comfort when worn.

ADN® BRILANTEX

Material with maximum strength and minimum volume, durable, breathable, extremely flexible, protects against UV rays, has antibacterial properties and excellent thermal conductivity, thanks to the closed structure of the fibres eliminates skin irritation and provides maximum comfort.

AN OVERVIEW OF FITS

A good silhouette ensures that clothes fit properly. Our products use the sophisticated ARDON® 3D silhouette, which copies the movement of the human body and emphasizes each respective body type. The good-looking, comfortable and ergonomically shaped fits are complemented by a wide range of sizes.

In order to choose the right clothes, it is important to understand what type of body you have and what type of fit suits you. Some prefer clothing that is looser, while others feel better in clothes that accentuate their figure. To make your selection of suitable clothing easier, ARDON® categorises garments according to the type of fit. The introduction of this typology together with the use of quality materials allows us to create slim athletic cuts or looser, more comfortable cuts.

SLIM FIT

COMFORT FIT

REGULAR FIT

SLIM FIT

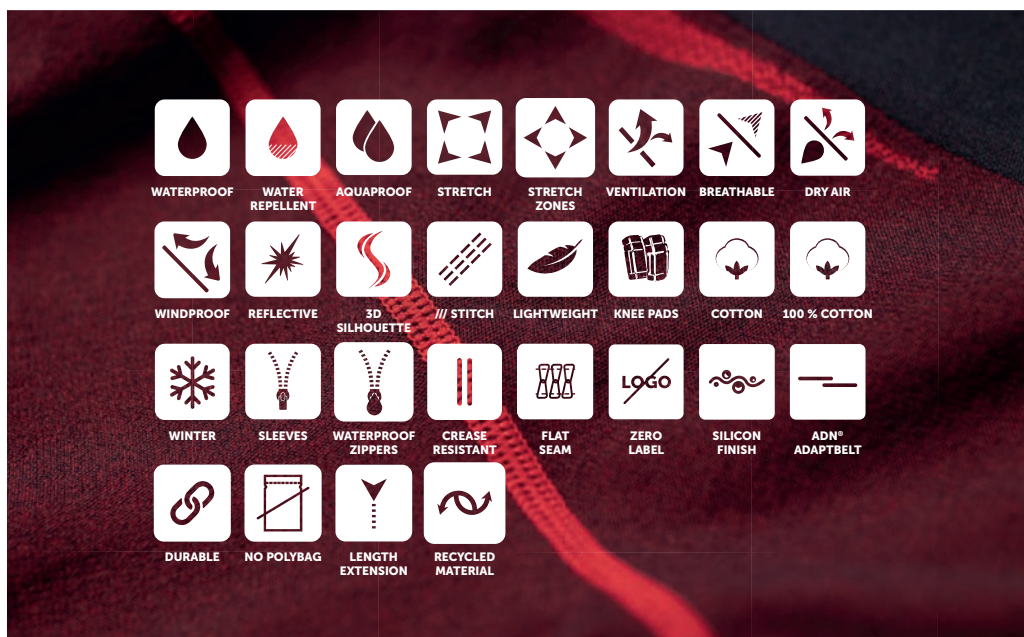

a tightly fitting cut that does not restrict freedom of movement thanks to sophisticated ergonomics and the use of specially designed flexible materials. This combination provides a comfortable fit. SLIM FIT with its slim silhouette and design details, perfectly accentuates one's figure. If you prefer looser types of clothing and like a product in the SLIM FIT category, it is recommended that you choose upper parts of clothing that are one size larger.

COMFORT FIT

a semi-fitted type of fit, highly functional. The combination of an ergonomic design and quality materials increases the comfort of the clothing. The optimally chosen width together with the sophisticated silhouette does not restrict movement and contributes to maximum comfort during any activity.

REGULAR FIT

a looser type of cut, characterised by wider trouser legs, sufficient back protection and looseness of the upper parts of the garment, allowing for comfortable, unrestricted movement.

WATERPROOF

The material has a functional membrane that makes it waterproof, while remaining as breathable as possible.

WATER REPELLENT

The material repels water, is lightweight and easily adapts to your body as you move.

AQUAPROOF

Special waterproof material with polyurethane coating, complies with EN ISO 343 - Rain protection.

STRETCH

The product is made of flexible material for maximum freedom of movement.

STRETCH ZONES

The garment contains functional inserts made of four-way stretch Tabiflex® material.

VENTILATION

The garment has ventilation press studs or functional zippers with mesh for effective ventilation during more strenuous exertion.

BREATHABLE

The material is breathable, wicking excess moisture to the surface.

DRY AIR

Quick-drying material, also suitable for more demanding activities.

WINDPROOF

The material provides protection from the wind while staying breathable.

REFLECTIVE

Safety reflective elements are used on the garment to increase visibility in low-light conditions.

3D SILHOUETTE

The garment has a special cut that copies the anatomy of the human body, is very comfortable and adaptable as you move, fits very well to different body types and is comfortable for a wide range of users.

/// STITCH

For greater strength and durability, the garment is triple stitched in parts that are subject to increased stress during use.

LIGHTWEIGHT

The garment is lighter weight, breathable and highly comfortable.

KNEE PADS

The garment has double fabric at the knees and a knee pad pocket, allowing the insertion of ARDON®JOE knee pads.

COTTON

The fabric used in the product contains cotton.

100% COTTON

The garment is made of cotton, a natural, highly absorbent and breathable material.

WINTER

Insulated winter clothing, with padding and a lining, or winter lining.

SLEEVES

The garment has detachable zip-off sleeves.

WATERPROOF ZIPPERS

The garment has waterproof zippers.

CREASE RESISTANT

Non-wrinkle material that holds its shape well and is less maintenance intensive.

FLAT SEAMS

The garment, which uses flat seam technology, is flexible even at the seam, the seam does not dig in and is comfortable to wear.

ZERO LABEL

Product without a logo. It is suitable as a promotional textile.

SILICON FINISH

The product is treated with silicone, prolonging its lifetime and improving its properties.

ADN®AdaptBelt

Innovative technology enabling a dungaree waist to be flexibly adjusted during any movement without feeling the slightest restriction.

DURABLE

The fabric used in the product is extra strong and resistant to abrasion and tearing.

NO POLYBAG

The product is not packed in a plastic bag.

LENGTH EXTENSION

The length of the legs can be extended by 5 cm.

RECYCLED MATERIAL

The product or part of it contains recycled material.

STANDARDS

CAT. I	Personal protective equipment (PPE) of simple construction which is designed based on the fact that the user can evaluate the level of protection against individual minimal risks that can be timely and safely identified by the user.			Protects: - against weather conditions that are not rare or extreme - against surface mechanical influences - when handling hot objects that do not expose the user to temperatures above 50 °C or dangerous shocks		
		Protective clothing - General requirements EN 13688:2013	This standard establishes general requirements for the design of protective clothing in terms of ergonomics, safety, sizing, ageing, compatibility and marking, as well as for the information to be supplied by the manufacturer with the protective clothing. It is binding for PPE CAT I, II and III.			
CAT. II	Category II PPE protects against risks not listed in categories I and III.					
		Protective clothing - Electrostatic properties - Part 5: Material and design requirements EN 1149-5:2018	European standard for clothing that protects against electrostatic discharge in areas where there is a risk of explosion. This standard is part of a series of standards related to protective clothing and specifically addresses the electrostatic properties of clothing.			
		Electrostatics - Part 5-1: Protection of electronic components against electrostatic effects EN 61340-5-1:2018	Garments complying with this standard shall prevent the build-up of electrostatic charge and safely dissipate this charge. If the electrostatic charge is not dissipated, significant damage to electronic equipment and components can occur.			
		High visibility warning clothing for professional use EN 20471:2013	Class 1	Class 2	Class 3	
	The standard specifies requirements for clothing that is capable of visually indicating the presence of the wearer. The garment should guarantee good visibility of the user in hazardous situations, both in any lighting conditions during the day and when illuminated by the headlights of a vehicle in the dark.		The lowest level of protection. They can only be used when there is infrequent contact with several vehicles or in slow moving traffic.	Much better protection than Class 1, especially in daylight, dusk and fog. Class 2 is used in harbours, railways, construction sites, parking areas and other places where Class 3 is not required.	The highest level of protection for workwear. Used in the vicinity of fast moving vehicles.	
		Protective clothing - Increased visibility for medium-risk situations EN 17353:2020	This standard specifies requirements for warning clothing to ensure that the wearer stays visible in medium-risk situations in daylight or when illuminated by vehicle lights.			
		Protective clothing - clothing components for protection against cold environments EN 14058:2018	This standard specifies the requirements and test methods for determining the performance of individual garment components in cold environments.			
		Protection against rain EN 343:2019	The standard specifies requirements for clothing to protect against rain and evaporation. The standard defines resistance to water penetration through the material and seams and to evaporation.			
CAT. III	PPE of complex construction intended to protect life and against hazards that can cause serious and permanent damage to health.					
		Protective clothing for use in welding and related processes EN 11611:2015		Protective clothing - General requirements and test methods for protective clothing against infectious agents EN 14126:2003		
	The International Standard specifies minimum essential safety requirements and test methods for protective clothing, including face shields, aprons, sleeves and gaiters, intended to protect the wearer during welding and similar processes.		The standard specifies requirements for the characteristics of protective clothing intended to protect against various biological hazards.			
		Protective clothing - Heat and flame protection clothing EN 11612:2015		Protective clothing against radioactive contamination EN 1073-2:2003		
	Protective clothing certified according to EN 11612 is used to protect workers in short-term contact with flames and against at least one type of high temperature. The test is limited to flame spread, similar to the test for welding protective clothing.		This standard specifies requirements and test methods for protective clothing for protection against contamination by radioactive particles.			
		Protective clothing against liquid chemicals EN 14605:2005		Protective clothing against liquid chemicals EN 13034:2005		
	The standard specifies requirements for clothing against penetration of liquids. The garments are divided according to types: type 3 - protects against penetration of liquids under pressure, type 4 - protects against penetration of liquids in the form of spray.		The standard specifies minimum requirements for chemical protective clothing for single and repeated use that offers limited protection against light spray, liquid aerosols or splashes at low pressure.			
		Protective clothing for use against particulate chemicals EN 13982-1:2004		Protective clothing - Protection against heat and fire EN 14116:2015		
	The standard specifies the minimum requirements for chemical protective clothing resistant to the penetration of airborne particulate matter (type 5). These garments provide full-body protection (i.e. covering the torso, arms and legs; e.g. one-piece coveralls or two-piece sets, with or without hood, with or without visor and with or without leg protection).		This standard specifies requirements for the characteristics of protective clothing intended to protect the wearer against accidental short-term contact with low-intensity flames.

CHEST CIRC.

WAIST CIRC.

HIPS CIRC.

INSEAM

BODY HEIGHT

Measure the circumference of the chest, waist and hips on underwear. Do not measure the width of the garment. The dimensions given in the size chart indicate the circumference of the body dimensions and do not correspond to the dimensions of the clothing.

CHEST CIRC.
measured around the widest part of the chest..

INSEAM
the dimension of the inside-leg seam of trousers, from the seam of the seat to the lower edge.

WAIST CIRC.
measured around the waist (ca. 3 cm above hip-bone).

HIPS CIRC.
measured around the widest part of the seat.

ARDON®ULTRITE®

The ARDON®ULTRITE® stretch-fit workwear collection combines high-quality materials and flexible functional zones. The specially developed, high abrasion and tear resistant ADN®Tegticore outer material together with CORDURA®, used to reinforce the stressed areas, guarantee excellent durability. The four-way Tabiflex® elasticated parts and the innovative, functional 3D Silhouette COMFORT FIT cut mean these trousers adapt perfectly to different body types and allow the best possible unrestricted freedom of movement. The original patented functional articulation lines meet the uncompromising requirements for a premium look. Dynamically positioned side ventilation zippers reliably help dissipate heat during more intensive exertion. The collection also features bottom zippers allowing the trousers to be comfortably pulled over ankle boots, as well as hidden hooks for fastening them to the boots. The collection is compatible with additional tool pockets designed to be attached to the belt with Velcro fasteners.

Use:

construction, logistics, transport, crafts, agriculture, services, hobby, leisure

ARDON®ULTRITE® TROUSERS

Work trousers with stretch inserts are designed for maximum comfort and durability. The combination of modern materials ensures excellent strength, flexibility and durability even in harsh conditions. The trousers are made of a special fabric with reinforced Cordura® panels for maximum protection against abrasion. The anatomical 3D Silhouette COMFORT FIT allows freedom of movement, while ergonomic lines ensure these trousers are comfortable to wear, with mesh side ventilation zippers helping to dissipate heat. The elasticated waistband enables easy adjustment of the waist circumference. The trousers are fitted with rivets for increased durability and a metal D-ring for attaching objects. The practical features include 2 deep gusseted pockets, 2 zipper pockets for mobile phones and small items and two multi-purpose zipper pockets at the back. For added safety, the trousers feature dynamic reflective elements for improved visibility when working in low light conditions. The bottom hem of the trousers has zippers that allow the trouser bottoms to be widened so they can easily be pulled over wider boots, as well as hidden metal hooks to keep the trousers perfectly in place. The trousers are compatible with additional reinforced tool pockets designed to be attached to the belt with Velcro fasteners. A set of additional tool pockets, which completes the collection, can be ordered separately under order number H6260.

ARDON®REFIWAN®

The ARDON®REFIWAN® workwear collection represents a new generation of workwear with multifunctional use. A modern solution that brings a unique combination of comfortable workwear and protective clothing for specialized production processes in one. The ARDON®REFIWAN® workwear collection uses the technical, lightweight and breathable REFIWAN®Fibre material characterized by extreme strength. The functional REFIWAN®Fibre material with anti-static fibre complies with EN ISO 13688, EN ISO 1149-5 and EN 61340-5-1 and is designed for industrial laundering. The combination of special hi-tech material and functional design brings new possibilities for the versatile use of the collection in various industrial sectors. The Silhouette with innovative pocket lines placed in the seams eliminates layering of materials. The exclusive design is enhanced by the precise, anatomically shaped 3D Silhouette COMFORT FIT cut. Reflective strips on the front and back ensure increased user safety in low-light conditions. The collection is free of metallic accessory parts and meets the standard for industrial laundering.

Usage:

manufacturing plants with ESD garment requirements, plants with industrial laundering requirements for workwear, construction, engineering, crafts, logistics, transport, services, hobby

JACKET ARDON®REFIWAN®

Workwear jacket certified according to EN ISO 13688, EN ISO 1149-5 and EN 61340-5. The optimum material weight ensures breathability and is the ideal choice for production facilities and outdoor use. The special fibre gives the garment high durability and strength along with anti-static properties, and design without visible zippers. The jacket is equipped with 1 internal zipped chest pocket, 2 side zipped pockets, elasticated hem of the blouse and sleeves. Anatomically shaped 3D COMFORT FIT cut. Reflective stripes on the front and back of the jacket ensure increased visibility. The left upper part of the blouse and left sleeve are designed to accommodate the company logo. The garment is free of metal accessory parts, and designed for industrial washing. Compatible with ARDON®REFIWAN® ID card.

ARDON®REFIWAN® SHORTS

These utility shorts complement the ARDON®REFIWAN® collection. The optimum grammage means the fabric is breathable, making it the ideal choice for production facilities and outdoor use. The shorts contain carbon fibre for extra durability and strength. The functional line of pockets in the seams means there is no layering of material; designed with no visible zippers, there is a hidden button at the waist. The shorts have two side pockets and two back pockets. The back part is divided by a saddle, while the elasticated waistband allows the waist to be adjusted to fit various body types. Sophisticated, anatomically shaped 3D Silhouette COMFORT FIT cut. Reflective strips on the front and back for extra visibility. The garment has no metal accessories and is designed for industrial washing. Compatible with the ARDON®REFIWAN® ID card. ARDON®REFIWAN® shorts do not comply with the requirements of the EN 1149-5 and EN 61340-5-1 standards; they provide only basic dust and surface mechanical resistance, and are therefore classified as Category I personal protective equipment.

ARDON®CREATRON®

The stretch collection of ARDON®CREATRON® workwears uses the popular Amalytton® cotton stretch material with unique weaving technology. Despite being lightweight, making the collection airy and breathable, it is extra-strong. Functional parts made of four-way stretch extra-resistant Tabiflex® fabric coupled with a sophisticated SLIM FIT cut ensure even greater comfort on the move. The collection features innovative ADN®A-daptBelt technology, taking comfort to a whole new level when wearing dungarees. It enables you to smoothly adjust the waist without feeling restricted however you move, so the dungarees can be perfectly adapted to suit any type of figure. The leg length can be easily extended by 5 cm. The original collection features by neon colours and 3D reflective prints. The range of functional tool pockets makes the collection the ideal choice for various uses in construction, industry and crafts.

ARDON®4xstretch®

ARDON®4xstretch® workwear combine the unique stretchable natural material Amalytton® with extra flexible and durable functional inserts made of the technical material Tabiflex®. The stretch material has been developed using the latest technology, which weaves high quality fibres. The Amalytton® brand guarantees the use of material with excellent technical parameters. The ARDON®4xstretch® collection is characteristic for its excellent adaptability to movement, flexibility, lightness, functionality and a slim silhouette in a special ergonomic 3D SLIM FIT cut. The collection features innovative ADN®AdaptBelt technology, taking comfort to a whole new level when wearing dungarees. It enables you to smoothly adjust the waist without feeling restricted however you move, so the dungarees can be perfectly adapted to suit any type of figure. The spacious multifunctional pockets provide ample storage space for tools and mobile phones. The design of the collection allows the use of various technologies when placing your company logo on the garment, such as embroidery or printing. The hi-vis reflective elements increase visibility under low-light conditions.

JACKET ARDON®4XSTRETCH®

A stretch work jacket with functionally inserted parts made of extra durable super elastic Tabiflex® material. The special Amalytton® material, used to make the work jacket, ensures increased strength and durability of the cotton fabric while maintaining elasticity and providing all the benefits of a natural material, such as breathability and a pleasant wearing. The work jacket with stand-up collar has an anatomically shaped and functional SLIM FIT cut. Functional back panels made of extra-stretchy Tabiflex® material contribute to an even better fit when moving. The work jacket has a zipper, is equipped with 1 zipper chest pocket, 1 zipper pocket on the left sleeve, and 2 convenient zipper side pockets; the width of the sleeves and the bottom hem of the jacket is adjustable with fasteners. The upper left part of the jacket is designed to bear a company logo in the form of either printing or embroidery. The back of the jacket has functional ventilation. Higher visibility is ensured by reflective stripes on the front and back and hi-vis accessories.

TROUSERS ARDON®4XSTRETCH®

The workwear pants with a knee pocket made of the special Amalytton® material, which provides increased strength and durability for cotton fabric while maintaining elasticity and providing all the benefits of a natural material, such as breathability and a pleasant wearing sensation. The Tabiflex® extra durable super elastic material is used on exposed parts. The trousers have a highly ergonomic and functional SLIM FIT cut that accentuates the silhouette, including an anatomically shaped knee design for maximum movement adaptability. The knee area has a double layer of the durable waterproof Oxford material and features a knee pocket, elastic waist with a hidden rear double belt loop for a comfortable belt fit. The trousers are equipped with a D-ring for a carabiner, 2 deep hidden pockets, 1 front zipper pocket, 1 front pocket with a wide loop, a multi-functional pocket for a folding tape measure, screwdriver and snap-off knife with wide loops on the right leg, a large double pocket covered with a button flap on the left leg. The back part is divided by a saddle and 2 pockets, the right back pocket is covered with a button flap. The bottom leg hem is reinforced with abrasion protective material Oxford. Higher visibility of the user is ensured by reflective stripes placed on the front and back and hi-vis accessories. The trousers allow easy extension of length by 5 cm.

ARDON®CREATRON®CAMO

Camouflage work pants with a unique ARDON®PLATCAMO textile pattern, inspired by the natural grain of plane tree bark. The top-quality Amalytton® cotton stretch fabric makes the collection even more unique. The highly functional 3D Silhouette SLIM FIT cut is complemented by parts made of Tabiflex®, a special highly durable and strong four-way stretch fabric. Being lightweight, the collection is airy and comfortable to wear. The leg length can be easily extended by 5 cm. A full range of sophisticated functional tool pockets makes the collection ideal for use not only for leisure and outdoor pursuits, but also for a wide range of industries, construction, engineering, agriculture and crafts.

ARDON®URBAN+

ARDON®URBAN+ workwear is characterised by their combination of a high-quality, strong-canvas weave fabric with extra flexible and durable functional zones made of the technical material Tabiflex®, which, thanks to its elasticity, ensures a comfortable fit and excellent adaptability while moving. Comfort is increased by the thermoregulating zippers located on the trousers. The decent design elements and use of the original ARDON® colour scheme guarantee that the style is timeless. Thanks to the excellent technical parameters of the clothing, high-quality design and the special COMFORT FIT ergonomic 3D cut, the collection is an excellent choice for a wide range of fields.

COMFORT FIT

ARDON®VISION

ARDON®VISION workwear is characterised by the use of a material made with a majority of natural cotton, distinctive decorative stitching and original reflective prints. The ergonomically shaped REGULAR FIT looser 3D cut adapts excellently to movement. The clothes in this line have increased back protection and a looser silhouette for those who appreciate comfort. With multi-functional work pockets for tools and mobile phones on both legs, ARDON®VISION workwear is used in a wide range of industrial, handicraft and construction sectors.

JACKET ARDON®VISION

A work jacket with innovative design details that perfectly adapts to different body types. The anatomically shaped cut and looser silhouette allow for absolute freedom of movement, even when worn over a warm sweatshirt. The quality twill fabric with a high proportion of natural cotton is breathable and comfortable to wear. It incorporates visually interesting design elements such as reinforced shoulder and sleeve parts as well as contrasting denim quilting, plastic moulded zippers, and original reflective printings for better visibility. The work jacket has anatomically shaped sleeves with flexible hems, adjustable with snap fasteners; the main zipper is covered by a strip; a large breast pocket with a Velcro flap; 1 zippered breast pocket; pencil loops; 2 large hidden zippered pockets; a zippered pocket on the left sleeve; the bottom hem is adjustable with snap fasteners. Effective ventilation on the back part, reflective tape on the front and back parts for better visibility.

SIGNAL+

Every Ardon Hi-vis workwear meets requirements of EN ISO 20471 standard, providing conspicuity of the wearer in daylight condition and under the illumination of the headlights in the dark. Hi-vis garments are made from fluorescent material with reflective elements. Several colours combinations are offered, fluorescent yellow, fluorescent orange, fluorescent yellow, fluorescent orange and fluorescent yellow/black. Letter "X", located in the right corner of the pictogram, represents the level of the protection expressed by the number.

The level of the protection can be increased by enlarging the area of reflective material, stated by EN ISO 20471, by a combination of several Hi-vis garments.

ART. NO.

H5926

H5927

EN 13758-1 – The first part of the standard deals with testing methods used for textile materials (e.g. spectrophotometric measurements); the second part covers the classification and marking of apparel textiles. UV-protective clothing for which compliance with this standard is claimed must fulfill all stringent instructions of testing, classification and marking, including having a UV protection factor (UPF) greater than 40 (UPF 40+). The long-sleeve SIGNAL shirt labelled and certified under this standard provides UVA and UVB protection 50+. Sun exposure causes skin damage; wearing a product with this certification increases the user's protection against this risk. Although the garment helps to protect the user, it is important to remember that merely wearing the garment does not offer complete protection. Only those parts of the body that are covered are protected; the level of protection decreases if the garment is used excessively, when wet or stretched. For product care, follow the maintenance instructions.

SWEATSHIRT ARDON®SIGNAL

A high visibility sweatshirt with a stand-up collar meets the requirements of clothing with high visibility. Ergonomic fit, zip fastening, reinforced saddle, shaping seams on the front, 2 zipper pockets, elastic cuffs on the sleeves and bottom hem of the sweatshirt, 2 segmented reflective tapes on the front, 2 on the back, 2 on the sleeves, additional segmented tapes on the shoulders for higher safety at work, reflective piping.

WOMEN'S ARDON®REFIWAN® JACKET

Women's workwear jacket designed for women is certified according to the standards EN ISO 13688, EN ISO 1149-5 and EN 61340-5. The optimum material weight ensures breathability and is the ideal choice for production facilities and outdoor use. The special fibre gives the garment high durability and strength along with anti-static properties, design without visible zippers. The jacket is equipped with 1 internal zippered chest pocket, 2 side zippered pockets, elasticated hem of the jacket and sleeves. Anatomically shaped 3D COMFORT FIT cut developed for a feminine silhouette. Reflective stripes located on the front and back ensure increased visibility of the user. Left upper part of the jacket and left sleeve designed to accommodate the company logo. The garment is free of metal accessory parts, designed for industrial washing.

ARDON®REFIWAN® PANTS

Women's pants designed for women are certified according to the standards EN ISO 13688, EN ISO 1149-5 and EN 61340-5-1. The optimum grammage ensures breathability and is the ideal choice for production facilities and outdoor use. The special fibre gives the garment high durability and strength along with anti-static properties. Functional pocket lines placed in the seams eliminate layering of material, design without visible zippers, with a hidden button at the waist. Pants feature 2 slit pockets, 2 front leg pockets, 2 back pockets. The back is divided by a yoke, a high waist collar developed for a feminine silhouette flatters the figure, elastic inserts allow adjusting the waist circumference for different body types. Anatomically shaped 3D COMFORT FIT cut with pre-shaped knees fits great, knee area made of double material for extra durability. Reflective stripes located on the front and back provide increased visibility for the user. The pants allow easy extension of the length by 5 cm. The garment is free of metal accessory parts, designed for industrial washing.

ARDON®REFIWAN® LADIES' BIB OVERALLS

Ladies' bib overalls certified according to EN ISO 13688, EN ISO 1149-5 and EN 61340. The optimum grammage means the fabric is breathable, making it the ideal choice for production facilities and outdoor use. Besides being anti-static, the carbon fibre makes the fabric strong and highly durable. The functional line of pockets in the seams means there is no layering of material; designed with no visible zips. The trousers have 2 slit pockets, 2 pockets on the front of the legs and 2 back pockets. A saddle divides the rear part. The ADN®AdaptBelt technology allows the waist width to be adjusted smoothly with every movement without feeling restricted. There is 1 inner zipper pocket on the bib and elasticated braces with a buckle for easy length adjustment. Sophisticated, anatomically shaped 3D Silhouette cut COMFORT FIT with contoured knees and a double layer of material at the knees for increased durability. Reflective strips on the front and back for extra visibility. The trouser length can easily be extended by 5 cm. The garment has no metal accessories and is designed for industrial washing. Compatible with the ARDON®REFIWAN® ID card.

CHILDREN'S TROUSERS ARDON®4XSTRETCH®

Children's stretchy cotton trousers made of a special Amalytton® material, which ensures increased strength and durability of the cotton fabric while maintaining the comfort of elasticity and all the benefits of the natural material, such as breathability and a pleasant feeling when worn. Extra durable super elastic material Tabiflex® is used on exposed parts. The trousers have a highly ergonomic and functional SLIM FIT cut, which emphasizes the silhouette, including an anatomically shaped knee design for maximum of movement adaptability. The knee area is doubled with a durable Oxford material with a water-repellent finish. The trousers have an adjustable waist width and are equipped with many useful pockets. The back part is divided by the saddle and 2 pockets, the right back pocket is covered by flap with rivet. The bottom hem of the trousers is reinforced with Oxford material against abrasion. Increased safety is ensured by reflective stripes located on the front and back and hi-vis accessories. The trousers allow easy length extension by 5 cm.

MATERIAL

Shell Fabric: Amalytton®: 98 % cotton, 2 % elastane
Contrast Tabiflex®: 92 % nylon, 8 % spandex

ARDON®ULTRITE®AIR HIKING TROUSERS

These state-of-the-art hiking trousers combine lightness, flexibility and breathability. The water-repellent BIONIC FINISH® ECO coating protects against water and dirt, making the trousers quick to dry while staying breathable. Up to 90% of this impregnation is made from renewable natural raw materials without the use of PFAS, or 'forever chemicals'. It stays effective even after repeated washing and is friendlier to the environment and your well-being than traditional treatments. Designed along original lines, the trousers include a zip mobile phone pocket reinforced with ultra-lightweight ripstop material that gives them a unique look. There are 3 additional zipper pockets to store your essentials. There are zippers that let you widen the bottom of the legs, as well as hidden hooks for attaching the trousers to your shoes, making them ideal for rough terrain. Their versatility makes these trousers a great choice for a wide range of outdoor and leisure activities.

ARDON®ULTRITE®GO! TREKKING PANTS

These men's trekking trousers combine lightness, breathability and excellent durability. They are fitted with inserts made of strong ripstop material, making them long-lasting and resistant to tearing and abrasion. The water-repellent BIONIC FINISH® ECO coating protects against water and dirt, making the trousers quick to dry while staying breathable. Up to 90% of this impregnation is made from renewable natural raw materials without the use of PFAS, or 'forever chemicals'. It stays effective even after repeated washing and is friendlier to the environment and your well-being than traditional treatments. The modern fit and sophisticated design make these trekking trousers the ideal choice for the outdoors and the city. They offer the greatest possible freedom of movement and comfort with every step. The side ventilation zippers that effectively dissipate heat make these trousers lightweight and ideal for any challenge. They feature some great practical details such as zipper pockets for storing small items, zippers to widen the bottoms and a hidden hook for attaching the trousers to walking boots. Reflective elements for extra visibility and safety in low light conditions. Embark on an adventure with these wonderfully comfortable and original trousers.

POLO SHIRT ARDON®ZIDYN

A men's polo shirt made of pre-washed cotton, which is more resistant to colour bleeding, and especially eliminates shrinkage after washing. The polo shirt made of pique cotton features a collar with a design element also found on the sleeve hem. The button placket is reinforced with a decorative patch, the bottom piece is extended and has side slits. The modern cut of the sleeves emphasizes the shape of the shoulders. The fabric is treated with a silicone layer that softens the surface, adds shine and extends the life of the product. The polo shirt has only a small size label sewn into the neckline and a label with material and maintenance information. The monochrome ZERO LABEL design makes the polo shirt the ideal product for merchandise and creative designs.

FUNCTIONAL VEST

ARDON®BREEFFIDRY MELANGE

This functional vest in a melange design provides great comfort thanks to its perfect and ergonomically shaped cut with an extended back. The vest has two spacious hidden zippered pockets and a designer zippered chest pocket. A practical cut with a zipper and a chin cover; the stand-up collar will keep your neck warm. The lower hem has stoppers that allow you to adjust the size. The inside of the vest is made of a very pleasant and soft material. The special ARDON®BREEFFIDRY material guarantees comfort thanks to its excellent permeability, abrasion resistance and perfect sweat wicking. The functional ARDON®BREEFFIDRY material retains heat while eliminating moisture. Thanks to its quick-drying properties, the vest can be worn during work, sports, and outdoor activities, even in adverse weather conditions.

Every softshell jacket should offer basic properties such as windproofness, water repellency, breathability and comfortable wear. You can choose from non-membrane softshell that breathes and resists wind incredibly well and is also very lightweight. This variant is offered by the BREEFFIDRY softshell jacket or the VISION jacket.

The second option is membrane softshell, which combines 100 % windproofness, waterproofness and breathability. There are many softshell jackets on the market with high waterproof rating at the expense of very low breathability, causing excessive sweating even with minimal activity and considerable discomfort.

That's why we offer the ideal combination of the basic properties of a 5000 mm, 5000 g/m²/24 h membrane softshell ensuring waterproofness as well as extreme breathability of the jacket. The quality of the jackets is guaranteed by the use of special ElasticTech®flexi and ElasticTech®active materials, which offer the optimal ratio of windproofness, water repellency or waterproofness and maximum breathability. At the same time, the ARDON softshell range stands out for its excellent silhouette, design and maximum comfort.

ARDON®ULTRITE®UNI FLEECE HOODIE

This versatile multi-purpose tactical fleece hoodie is the ideal choice for work, outdoor, hiking and everyday wear in the city. The warm fleece is reinforced with strong ripstop material in the stressed areas of the shoulders and elbows for increased durability. The hoodie has a hood with a drawstring, and a sophisticated silhouette cut with adjustable width at the bottom hem. It offers 2 spacious zipper pockets, a multi-purpose back zipper pocket accessible from two sides and conveniently placed zipper pockets on the sleeves for small equipment. Ventilation zippers dissipate heat during active exertion and work. The hoodie is the perfect combination of functionality, practicality and an original style.

STRETCH SOFTSHELL JACKET ARDON®BREEFFIDRY STRETCH

A men's stretch softshell jacket with a hood; very light, completely flexible, and adaptable to motion. The jacket is made from one-layer of functional ARDON®BREEFFIDRY light material, which features dual weaving technology. The outside is resistant to abrasion, and is both waterproof and effectively windproof. The inside provides excellent breathability and quickly wicks sweat away to the surface. Four-way stretching enables total freedom of motion. The jacket has a light hood lined with elastic, a protective chin cover, a zippered chest pocket, two zippered pockets, anatomically shaped sleeves with elastic cuffs, an extended back, and internal stopper cords to adjust the fit. Reflective print for greater safety. A fitted slim cut, functional elastic Tabiflex® material that adjusts to every motion, and a soft finish on the inside guarantees comfort in all situations. The men's jacket suitable for demanding work, sports, and outdoor activities.

ARDÓN®ULTRITE®SOFTSHELL JACKET

A durable softshell work jacket with removable drawstring hood and underarm ventilation zippers for maximum comfort. The jacket has a functional membrane to stop you getting wet, while maintaining optimal breathability and wind resistance. The ergonomic, innovative 3D Silhouette cut and stretchy soft-shell ensure excellent freedom of movement and a perfect fit during more strenuous activities, while the practical pockets provide plenty of storage space. The adjustable jacket hem allows you to set the optimal width. Reflective elements for extra safety. Ideal for professionals who need reliable all-weather protection as well as stylish leisurewear.

MATERIAL

Shell Fabric: ElasticTech®Prime: 95% polyester, 5% elastane
Inner material: 90% polyester, 10% elastane

STANDARDS

EN ISO 13688:2013 - Protective clothing, general requirements

TECHNOLOGIES

This high-quality twill weave softshell is highly durable and lightweight. It does not crease and is as supple as possible. The functional membrane provides added protection against water and wind while staying breathable.

SOFTSHELL TROUSERS ARDON®CREATRON®

Men's softshell trousers in a sophisticated SLIM FIT cut. Ideal for demanding outdoor activities. The four-way light-weight stretch ElasticTech®Flexi softshell combined with the functional shape of the trousers guarantees a great fit. Thanks to its membrane, the trousers are also suitable for demanding weather conditions as they are waterproof and breathable at the same time. Ventilation zippers with mesh on the outside of the thighs. The back part consists of a saddle and 1 zipper pocket. There are 2 zipper pockets on the leg fronts and the elastic waistband increases the comfort of wearing. The lower part of the trousers can be adjustable with buttons. There is an internal hook with elastic rubber for fastening the trousers to the shoes. The design is enhanced by 3D high-visibility printing.

ARDON®ULTRITE®AIR LADIES' HIKING TROUSERS

These state-of-the-art ladies' hiking trousers combine lightness, flexibility and breathability. The water-repellent BIONIC FINISH® ECO coating protects against water and dirt, making the trousers quick to dry while staying breathable. Up to 90% of this impregnation is made from renewable natural raw materials without the use of PFAS, or 'forever chemicals'. It stays effective even after repeated washing and is friendlier to the environment and your well-being than traditional treatments. Designed along original lines, the trousers include a zip mobile phone pocket reinforced with ultra-lightweight ripstop material that gives them a unique look. There are 3 additional zipper pockets to store your essentials. There are zippers that let you widen the bottom of the legs, as well as hidden hooks for attaching the trousers to your shoes, making them ideal for rough terrain. Their versatility makes these trousers a great choice for a wide range of outdoor and leisure activities.

ARDON®JASVENA JEANS LADIES' JEGGINGS

These ladies' jeggings are the ideal combination of style and comfort for everyday wear. With excellent elasticity, they adapt to the figure and allow freedom of movement without compromising on comfort. The material is durable, yet soft to the touch. Modern styling guaranteed by refined details such as decorative rivets, stitching on the back pockets and a decorative print on the inner pocket pouch. The original print on the inside of the legs, which can be turned up, means they can be worn for different occasions.

CHILDREN'S TROUSERS ARDON®4XSTRETCH®

Children's stretchy cotton trousers made of a special Amalytton® material, which ensures increased strength and durability of the cotton fabric while maintaining the comfort of elasticity and all the benefits of the natural material, such as breathability and a pleasant feeling when worn. Extra durable super elastic material Tabiflex® is used on exposed parts. The trousers have a highly ergonomic and functional SLIM FIT cut, which emphasizes the silhouette, including an anatomically shaped knee design for maximum of movement adaptability. The knee area is doubled with a durable Oxford material with a water-repellent finish. The trousers have an adjustable waist width and are equipped with many useful pockets. The back part is divided by the saddle and 2 pockets, the right back pocket is covered by flap with rivet. The bottom hem of the trousers is reinforced with Oxford material against abrasion. Increased safety is ensured by reflective stripes located on the front and back and hi-vis accessories. The trousers allow easy length extension by 5 cm.

Metric data are for guidance only and may vary from shoe type to shoe type.

WEIGHT

± ? g Approximate weight of a half-pair of shoes in size 42 (+/- 5%)

Choosing the right size is essential for footwear. Unfortunately, there is no uniform size chart. The final size of the finished shoe can slightly vary among the individual by individual manufacturers depending on design, the production process and material composition.

For this reason, it is best to follow the recommended length of the foot for the size given in the table for each model of our shoes, where an allowance of 0.5 cm is added for low-shoes and 1 cm for ankle and higher shoes.

1. put on the socks you will usually wear in your shoes.
2. stand on a sheet of paper with your heel perpendicular to the wall.
3. then use a pen and ruler to draw a line just in front of your longest toe.
4. measure the distance between the wall and the line you just drew.
5. select the appropriate size.

DEFUSE CONTROL

The footwear is equipped with an insole with a cushioning element in the heel part.

DRY AIR

The lining is made of a fabric that efficiently removes moisture.

NON METALLIC

The footwear does not contain any metal parts.

WATER REPELLENT

Waterproof upper treatment.

REFLECTIVE

Reflective element for higher visibility.

FOOT COMFORT

The shoe is equipped with a wide toe cap for greater toe comfort.

ANTI BACTERIAL

The lining and insole treatment prevents the multiplication of mold and bacteria.

WASH FRIENDLY

The shoe is washable in an industrial washing machine up to 30 ° C, max. 5 cycles.

ZIPPERS

The shoes are equipped with a system for easy putting on / taking off.

WINTER

The shoes are equipped with winter insulation.

MEMORY FOAM

Product with the memory foam.

FITGO

Quick fastening system.

FLAT ANTI-SLIP

Shoes with flat soles.

3D KNIT

Seamless technology of a knitted upper that adapts to the shape of the foot.

quick lacing system

Quick shoe lacing systems are gaining popularity among customers not only for their speed and convenience, but more importantly for how reliably they can secure shoes to the foot. That increases the user's safety when moving around in difficult terrain and prevent the shoes from coming loose during use.

In the ARDON® collection, some models are equipped with top-quality systems from the established FITGO and SPINON brands.

Their main advantages are:

- Reliable functionality
- Easy manipulation
- Fast shoe securing
- No loose and long laces

Pull the wheel upwards for quick release.
Push the wheel downwards to activate.
Rotate the wheel to tighten the shoe.

RADICAL POWER

ARDON®

PRECISION AND CONTROL
PREMIUM WORKWEAR

The core values of the Ardon® brand include precision and continuous quality control. We continuously check the key parameters of our products to ensure that you receive goods that meet mandatory standards and the most demanding requirements.

In our footwear laboratory we regularly test safety, work and outdoor models on the following types of test equipment:

- Resistance of the sole and upper to repeated bending - we evaluate the quality of the materials and joints used under a heavy load.
- For safety footwear, its impact resistance of 200 J and compression resistance of 15 kN are tested.

The „Comfortable Shoes” certification is used based on a license granted by the Czech Footwear and Leather Association. It provides the consumer with the assurance that the footwear is of the correct construction, ensuring comfortable wearing without health risks, with high durability and long life, with the correct size marking, and meeting several other quality parameters.

NEW

ARDON®ENERDIG

These ENERDIG safety shoes are the ideal choice for anyone needing protection and comfort at work in a stylish modern design. The upper is made of a combination of water-repellent textile and microfibre, guaranteeing excellent durability and breathability. The water-resistant membrane prevents water from getting inside the shoe and also provides a comfortable microclimate. The anatomical foam insole moulds to the shape of the foot and absorbs shocks well. The lightweight Phylon/rubber sports sole is suitable for both indoor and outdoor wear. The shoes are fitted with non-metallic safety components and have an anti-static ESD rating. The lacing system with a turning knob takes user comfort to a new level. This is high-end universal footwear suitable for a wide range of applications in a variety of working environments.

ARDON®BRICK LOW NEO

Safety shoes complementing the popular BRICK collection. New generation footwear – combining maximum protection and clean design. The upper is made of highly durable Woven-tek, a material that provides exceptional mechanical resistance as well as being breathable and flexible. Ideal for all-day wear even in the harshest conditions. The PU/rubber sole, manufactured using direct injection technology, guarantees excellent grip, resistance to abrasion, oil and high temperatures up to 300 °C. The tread of the sole, reminiscent of a winter tyre, provides excellent traction and stability even in difficult terrain. The composite toe cap protects the toes from impacts of up to 200 J. The Kevlar insole reliably protects the foot from punctures from below. The footwear is also ESD-compliant. The upper, which has a quick-release fastener rather than conventional laces, provides excellent protection and stability for the foot while at work. This footwear is designed for professionals requiring the best possible gear.

ARDON®ENERDIG

The work version of these ENERDIG shoes is the ideal choice for anyone who needs to stay comfortable at work and prefers a stylish modern design. The upper is made of a combination of water-repellent textile and microfibre, guaranteeing excellent durability and breathability. The anatomical foam insole moulds to the shape of the foot and absorbs shocks well. The lightweight Phylon/rubber sports sole is suitable for both indoor and lighter outdoor wear. This is high-end universal footwear suitable for a wide range of applications in a variety of working environments, as well as for leisure wear.

ARDON®BRICK BLUE LOW

This work shoe complements the popular BRICK collection. New generation footwear – combining maximum protection and clean design. The upper is made of highly durable Woven-tek, a material that provides exceptional mechanical resistance as well as being breathable and flexible. Ideal for all-day wear even in the harshest conditions. The PU/rubber sole, manufactured using direct injection technology, guarantees excellent grip, resistance to abrasion, oil and high temperatures up to 300 °C. The tread of the sole, reminiscent of a winter tyre, provides excellent traction and stability even in difficult terrain. The upper, which has a quick-release fastener rather than conventional laces, provides excellent protection and stability for the foot while at work. This footwear is designed for professionals requiring the best possible gear.

ARDON®NARDOX

Safety footwear designed for welders and users in the metalworking industry exposed to the risk of high thermal and mechanical stress. The upper is made of high-quality cowhide leather with a water-repellent finish that ensures resistance to heat and mechanical damage. The two-layer PU/rubber sole provides excellent grip and can withstand temperatures up to 300 °C. The steel toe cap protects the toes from impact and pressure, while the Kevlar insole reliably prevents punctures. The Velcro fastener makes them quick and safe to put on with no loose parts that could catch sparks. The footwear meets the protection requirements for welding, grinding and other hazardous work.

ARDON®METALURG

This safety footwear is designed for use not only in foundries and the metalworking industry, but also wherever you need boots that are easy to put on and provide protection against safety hazards. The special design makes these boots easy to put on and ensures a secure fit. The upper is made of hydrophobic cowhide leather that is resistant to mechanical damage. The PU/rubber sole can withstand temperatures up to 300 °C and provides a reliable grip even on slippery surfaces. The steel toe cap protects the toes from impact, while the Kevlar insole provides effective protection against punctures from below. This makes these boots the ideal choice for demanding work with high safety requirements.

NEW

ARDON®BRICK BLUE

Working ankle-boot version of the popular BRICK model. New generation footwear – combining maximum protection and clean design. The upper is made of highly durable Woven-tek, a material that provides exceptional mechanical resistance as well as being breathable and flexible. Ideal for all-day wear even in the harshest conditions.

The PU/rubber sole, manufactured using direct injection technology, guarantees excellent grip, resistance to abrasion, oil and high temperatures up to 300 °C. The tread of the sole, reminiscent of a winter tyre, provides excellent traction and stability even in difficult terrain. The ankle structure with a quick-release fastener rather than conventional laces provides excellent protection and stability for the foot while at work. This footwear is designed for professionals requiring the best possible gear.

ARDON®BRIMSAN

The Brimsan safety sandal is designed for a wide range of work environments where protection, comfort and breathability are a priority. The stylish high-quality microfibre upper guarantees excellent durability and protection. It has a breathable MESH lining for extra comfort, while the 3D EVA insole provides excellent shock absorption. The two-component PU/PU sole is lightweight, flexible and oil-resistant with SR slip resistance. The footwear meets the ESD standard. The sandal has a lightweight composite toe cap and Kevlar puncture-resistant sole. Ideal for all-day wear in a wide variety of working conditions where comfort and good ventilation are a priority.

HydroGuard®

waterproof

HYDROGUARD® is a waterproof and breathable polyurethane membrane that is covered with billions of microscopic pores, giving the laminate its unique water repellent and breathable properties. The pores are optimally sized to allow water vapor molecules (sweat and body moisture) to escape while keeping water droplets out. The membrane is flexible, making it particularly suitable for use in footwear and clothing.

Technical data for the membrane Hydroguard waterproof

Material	polyuretan
Thickness	0.025 mm
Stretch before tearing	150 %
Water column height	4000 mm H ₂ O
Dynamic water resistance test	50 000 bends
Vapour permeability (Satra TM47)	3.52 mg/cm ² /h
Breathability (MVT, EN ISO 20345)	20,1 mg/cm ²

H14067

Sports insoles, anatomically shaped, cushioned step.

|||||||

36-37, 38-39, 40-41, 42-43, 44-45

ARDON®INS WOOL

H1493

Winter insoles, aluminium layer at the bottom, felt with 30% wool at the top.

|||||||
UNI

ARDON®CARBON
H14003

Antibacterial insoles, universal size, trimmable.

|||||||
39 cm

ARDON®CP4
H1509

Lightweight wooden shoe horn.

|||||||
22 cm

ARDON®CP3
H14063

Plastic shoe horn.

|||||||
38-42, 43-47

ARDON®DRUM
G1306

Safety shoe covers for visitors.

|||||||
110/130 cm

ARDON®SL
H14069

MATERIAL 100 % polyester

|||||||
105/110 cm

H1484:105/110/120/140 cm
ARDON®DIGGER
H1482, H1485, H1483,
H1486, H1484

MATERIAL 100 % polyester
Round shoelaces.

EN 388:2016

Specifies the requirements, test methods, labelling and information supplied for protective gloves against mechanical hazards caused by abrasions, blade cuts, tearing and punctures.

EN ISO 374-1:2016

Protective gloves against chemical risks of type A/B/C.

FUNGI VIRUS

Protective gloves against bacteriological risks.

EN 407:2004, EN 407:2020

User information and labelling of protective gloves against heat or fire.

EN 511:2006

The standard specifies the requirements and test methods for protective gloves against cold.

STANDARDS

EN ISO 21420:2020
EN 420+A1:2010

provides general requirements and relevant test procedures for designing gloves, their resistance to water, safety, comfort, efficiency, labelling and information provided by the manufacturer that applies to all protective gloves EN 21420 (published in 2020) elaborates on and specifies the requirements included in EN 420, namely skin safety and glove labelling, and defines labels for static electricity safety

EN 388:2016

Specifies the requirements, test methods, labelling and information supplied for protective gloves against mechanical hazards caused by abrasions, blade cuts, tearing and punctures.

A

ABRASION RESISTANCE
0-4

MARTINDALES TEST
according to ISO 12947-1,
pressure on sample
(9.0 +/- 0.2) kPa.

D

PUNCTURE RESISTANCE
0-4

THE STEEL SPIKE TEST
compression tool according to EN ISO 7500-1 force exerted by a steel stylus, not to be confused with piercing by needles!

B

CUT RESISTANCE
0-5

BLADE CUT TEST
circular blade, mass applied
in force 5n horizontal movement
5mm blade rotating 360°.

E

CUT RESISTANCE
A-F

TDM CUT TEST
according to ISO 13997:1999,
plain blade with different cutting loads,
now required for gloves with level 4
and above resistance to cutting

C

TEAR RESISTANCE
0-4

TESILE TEST
compression tool according to EN ISO 7500-1 20mm of each pre-cut defined strip. Tearing force is recorded on an X-Y recorder.

F

IMPACT PROTECTION
EN 13594:20150 – P

test is carried out according to en 13594:2015 with impact energy of 5J. if the glove passes this test it is marked with a "P", if not the product is not intended to be used for impact protection. This is optional information.

EN ISO 374-1:2016

protective gloves
against chemical risks
of **type A/B/C**

protective gloves
against **bacteriological**
risks

PERMEATION
the process by which a chemical moves through a protective glove material on a molecular size permeation is measured through diffusion according to EN 16523-1:2015.

TYP C

LOW CHEMICAL
RESISTANCE
EN ISO 374-1:2016

1

CHEMICALS*
breakthrough
time ≥ 10 min*

TYP B

MEDIUM RESISTANCE
TO CHEMICALS
EN ISO 374-1:2016

3

CHEMICALS*
breakthrough
time ≥ 30 min*

TYP A

HIGH RESISTANCE
TO CHEMICALS
EN ISO 374-1:2016

6

CHEMICALS*
breakthrough
time ≥ 30 min*

* LIST OF TESTED CHEMICALS

A - methanol
B - acetone
C - acetonitrile
D - dichloromethane
E - carbon disulfide
F - toluene

G - diethylamine
H - tetrahydrofuran
I - ethyl acetate
J - n-heptane
K - 40 % sodium hydroxide
L - 96 % sulfuric acid

N - 65 % nitric acid
M - 99 % acetic acid
O - 25 % ammonia
P - 30 % hydrogen peroxide
S - 40 % hydrofluoric acid
T - 37 % formaldehyde

EN ISO 374:2016

PENETRATION

Permeation of a chemical through the materials, seams, holes or other weak spots in the material of a protective glove on a non-molecular size penetration can be measured by water penetration according to EN 374-1:2014.

EN ISO 374-5:2016

MICROORGANISMS
AND BACTERIA

test according to EN ISO 374-2
requirements in EN ISO 374 5

VIRUS

EN ISO 374-5:2016

VIRUSES

the gloves conform with
ISO 16604:2004 (method b)

DEGRADATION

According to EN 374, it is now necessary to measure and indicate material degradation as a %. Gloves commonly lose their mass (-X %) or swell (+X %) in response to chemicals.

Specifies the requirements, test methods, user information and labelling of protective gloves against heat or fire; should be used for all gloves that protect against heat or flames in one or more of the following forms.

A

RESISTANCE TO
IGNITION (0-4)

B

RESISTANCE TO
CONTACT HEAT (0-4)

C

RESISTANCE TO
CONVECTIONAL HEAT (0-4)

1	2	3	4
100°C	250°C	350°C	500°C
for 15 s			

D

RESISTANCE TO
RADIANT HEAT
(0-4)

E

RESISTANCE TO SMALL
DROPS OF MOLTEN METALS
(0-4)

F

RESISTANCE TO LARGE
DROPS OF MOLTEN METALS
(0-4)

The standard specifies the requirements and test methods for protective gloves against cold.

A

RESISTANCE TO
CONVECTIONAL COLD
(0-4)

B

RESISTANCE TO
CONTACT COLD
(0-4)

C

WATER PERMEABILITY
(0 - PERMEABLE,
1 - NON-PERMEABLE) 0 - 1

Safety gloves for welding, A, B, and A/B classes. A – mechanically more demanding work, sturdier gloves. B – softer gloves for more precise work (TIG, soldering, etc.). A/B – suitable for both types of work.

Gloves for protection against vibrations and shocks.

PROPERTIES OF VISOR

2-1,2 / 2C-1.2

Clear visor

protection against impacts and uv radiation. supports clear and non-distorted vision.

2-1.2 / 2C-1.2

Yellow visor

protection against impacts, UV radiation and blue light up to 480nm improves contrast in low light conditions.

2-1.7

Orange visor

protection against impacts, UV radiation and blue light up to 480nm improved contrast and higher visual acuity, reduces eye strain.

1,7; 3,0; 5,0; 7,0

Welding visor

protection against impacts, UV radiation and blue light up to 480nm improved contrast and higher visual acuity, reduces eye strain.

2-1.7

In/Out visor

protection against impacts, UV radiation and sharp light; protects against sunlight; provides great visibility in extreme conditions; designed for users who frequently move from indoors to outdoors and back

5-3.1

Smoke visor

protection against impacts, UV radiation, provides great protection against glare, excellent colour recognition.

5-3.1

Brown visor

Protection against sunlight and glare, allows the eyes to better adapt to changing lighting conditions.

5-3.1

Solar visor G15

protection against intense sunlight, relaxing, excellent colour recognition.

5-3.1

Polarising visor

Protects against UV radiation, minimises unwanted sun glare, increases contrast.

5-3.1

Mirror visor

The mirror surface provides excellent protection against glare and reflections, excellent colour recognition.

STANDARDS

EN 166
EN 170
EN 171

- Personal eye protection.
- Filters against UV radiation.
- Filters against infrared radiation.

EN 172
EN 175
EN ISO 16321-1

- Sunglare filters for industrial use.
- Personal protection - equipment for eye and face protection during welding and similar processes.
- Eye and face protection for work use.

MECHANICAL RESISTANCE

FT/CT
BT/ET
AT

- Low energy impact under extreme temperatures (-5°C to 55°C), max. speed 45 m/s
- Medium energy impact under extreme temperatures (-5°C to 55°C), max. speed 120 m/s
- High energy impact under extreme temperatures (-5°C to 55°C), max. speed 190 m/s

KN
S
DT

- Protection against fogging (N) and scratches (K)
- Increased strength, max. speed of 12 m/s
- Medium energy impact under extreme temperatures (-5°C to 55°C), max. speed 80 m/s

OPTICAL LINE 1

Permanent wear
Optical class 1 is designed for long-term wear, the smallest tolerance is ±0.06 diopters. In general, it is recommended that in case of problems while being worn, more types of glasses should be tested and the ones that suit the user the best should be chosen.

TYPE OF FILTER

2 / U1.2
2C / UL 1,2
4 / R4

- UV filter
- Filter with good colour recognition
- Infra-red filter

5 / G3
6

- Solar filter
- IR solar filter

APPROPRIATE FIELD OF USE

- | | | | |
|---|--------------------------------------|---|---|
| 3 | Liquid drops | 6 | Protection against liquids under pressure |
| 4 | Large dust particles (up to 5 µm) | 7 | Protection against chemicals |
| 5 | Gases and fine dust (less than 5 µm) | 9 | Molten metals and large solids |

ARDON®ULTRITE®SB

Modern, flexible and multi-purpose goggles with a sporty design. Grooved soft nose bridge, rubberised, non-slip and softened temple tips. Precision Blue REVO technology blocks blue light, minimises glare in bright sunlight and improves visual sharpness and contrast. Premium surface coating to protect against abrasion and fogging (NK certification), up to 400 nm UV protection. The frame of these glasses is made of Grilamid TR 11261 natural, containing 51% carbon from renewable sources (certified according to ASTM D 6866:2024). The petroleum content is partially substituted by castor oil, which is renewed every year. This reduces the proportion of fossil raw materials and increases the material's natural carbon content. Grilamid TR is lighter than polycarbonate, yet stronger and more durable, while assuring excellent resistance to chemicals and high temperatures.

ARDON®PURE X

Comfortable, modern, and multifunctional sports-style glasses offer a combination of safety, comfort, and versatility. Thanks to their shape, they are suitable for both leisure and work. Adjustable nose bridge ensures comfortable wear even during prolonged use. The rubberized, anti-slip, and softened temple tips guarantee that the glasses will fit perfectly and do not slide. The revolutionary smoke/red mirror surface coating filters out excessive glare and reflections, improves visual comfort and reduces eye fatigue, especially in bright sunlight. The lenses offer anti-scratch and anti-fog protection, UV protection up to 400 nm.

A patented nose pad from hypoallergenic material with height adjustment

UNIVET MASTR

The Univet MASTR laser welding helmet is specially designed to protect against scattered and diffused light generated during welding processes that are performed with handheld laser systems. The complex solution combines a helmet made of a special composite material, a laser protection filter and a welding self-darkening filter. It protects the user's eyes and face from diffused laser light and from optical radiation that occurs during the welding process.

SAFETY HELMET PAB WH1-C, ELECTRICALLY INSULATED

MATERIAL ABS
COLOUR white, hi-vis, blue, red, orange
ART. NO. D1079
STANDARDS EN 397, EN 50365

The industrial safety helmet offers the best protection, great comfort, and a wide range of applications. The adaptability and design, plus a broad range of optional accessories, make this helmet highly versatile. Strong impact and heat resistance ABS shell, resistance to lateral deformation, resistance to molten metal splashes, flame exposure and chemical liquids. 6 point textile harness limits heat transfer, and offers more flexibility and comfort. Size adjustment (52 – 63 cm) with a simple system (ratchet) that provides a more precise adjustment to the head size of the helmet wearer. Low-temperature classification from -30°C to +50°C. Washable cotton band against sweating. 4 points chinstrap offers anchoring resistance and prevents suffocation. Protects against short-term accidental contact with live electrical conductors up to 440 V AC. Suitable to use at low voltage installations up to 1000 v AC and 1500 V DC (Class 0). The helmet is electrostatically safe and suitable for use in explosion hazardous environments in Zone 1 and Zone 2. The helmet can therefore be used in environments where mixtures of gases, vapours, mists or dusts are generated which may ignite under certain conditions. Explosion groups: IIA, IIB, IIC. 10 years lifetime.

PAB WH1-C

5-RS

MATERIAL high density polyethylene

COLOUR white, yellow, orange, red, blue, green

ART. NO. D1018

STANDARD EN 397

Classic polyethylene protective helmet, heat resistance ranging from -20 °C to + 50 °C, electrical insulation up to 1000 V AC and 1500 V DC, easily adjustable size, expected lifespan of 5 years, available colours: white, yellow, orange, red, blue and green, 5-RS-2 head sweatband and 5-RS-3 interior fabric interior cross are included, accessories may be ordered.

G3001

MATERIAL	ABS
COLOUR	white, adjustment wheel
ART. NO.	D1242/K
STANDARD	EN 397, EN 50365

Protective helmet without any ventilation, easy size adjustment, head sweatband, working temperatures from - 30 °C to + 55 °C, 440 VAC, 1000 V in accordance with EN 50365, ABS plastic stabilized against the influence of UV radiation, life span of 3 to 5 yearp.

G3000 NUV

MATERIAL	ABS
COLOUR	white, yellow, hi-vis yellow, orange, red, blue, green
ART. NO.	D1247
STANDARD	EN 397

A protective helmet designed for harsh environments, with excellent ventilation and a good field of vision, the head cross can be rotated 180° for better visibility when working in confined spaces, head cross with an adjustment wheel, rounded shape with a short visor and the 3M™ Uvicator™ indicator.

G3000 CUV

MATERIAL	ABS
COLOUR	white, yellow, hi-vis yellow, orange, red, blue, green
ART. NO.	D1227
STANDARD	EN 397

Very comfortable helmet with ventilation holes, easy size adjustment, sensor indicating whether the helmet is still usable, head sweatband, excellent stability, ABS plastic stabilized against the influence of UV radiation, life span of 3 to 5 years, the helmet includes a fabric head cross with a cloth forehead sweatband.

TURBOSHIELD 1

MATERIAL ABS, nylon 66
COLOUR black
ART. NO. E5029
STANDARD EN 166

Patented safety shield with a system for easier and quicker visor changing, breathable removable sweatband, the toric lens provide excellent optics and an increased field of view, the size is easy to adjust even with gloves via the adjustment wheel – smooth-lifting system of the shield stops in both raised and folded positions, a simple "push" button for easy release that allows for a rapid visor exchange in just seconds, spare visors are available in clear, smoke and welding designp.

TURBOSHIELD 2

MATERIAL nylon
COLOUR black
ART. NO. E5030
STANDARD EN 166

The strong head shield is compatible with most safety helmets (with the exception of helmets with a full edge), intuitive fastening visor system for quick and easy replacement, the locking hinge secures the visor while its lifted or lowered, the patented construction centres the visor when above the head, provides better balance, integrated protective edge provides a fitting with no holes between the shield holder and the helmet and provides protection from material falling from above.

**respiratory
protection**

THE CHOICE OF FILTER CLASS BASED ON THE ACTIVITY

ACTIVITY	MATERIALS	FFP	IMPORTANT INFORMATION	ACTIVITY	MATERIALS	FFP	IMPORTANT INFORMATION
sandblasting, cutting, drilling	rust, metal particles	P1	-	work with glass and mineral fibres	-	P2	-
	concrete, stone	P1	with a high concentration of silicone				
	cement, wood, steel	P2	-	sorting of waste	-	P3	a half mask protecting against gases and vapours may be necessary
	paints, varnishes, anti-corrosive coatings	P2	in the presence of chromes				
	steel, stainless steel	P3	-	spray painting	spray painting	P2	a half mask protecting against gases and vapours may be necessary
	anti-settling paint	P3	a special filtr. half mask may be necessary		pesticides (water soluble)	P2	-
injection of oil at low temperatures	-	P2	-				
welding	mild steel, zinc, (autogen, mig/mik)	P2	3M 9928 or 9925 for ozone protection	technical maintenance (e.g., replacement of filters)	-	P3	-
	stainless steel (electrodes)	P3	3M 9928 or 9925 for ozone protection	allergies	pollen, animal fur grain dust	P1	-
	soldering	P2	-		mold, fungi	P2	-
work with asbestos	very small quantities	P2, P3	-	contact with	bacteria	P2	tuberculosis
					exhaust gases	P2	

Warning: These instructions are for information only and should not be used as the sole means for choosing a respirator. Details regarding the performance and limitations are listed on the packaging and in the user instructions for each respective respirator. Before using any of these respirators, the user must read the instructions for each product and understand them; the relevant national legislation must be observed.

HALF MASKS AND FULL-FACE MASKS

the 6000 and 7500 series can be combined with the following filters:

ART. NO.	FILTER	DEGREE OF PROTECTION	TESTED ACCORDING TO STANDARD	ART. NO.	FILTER	DEGREE OF PROTECTION	TESTED ACCORDING TO STANDARD
1. filters against gases and vapours				2. filters against fine particles with a bayonet lock

F4021	6099*	A2, B2, E2, K2, P3	EN 141				

Half masks should be used only up to a maximum of 10 times the MCP. Full-face masks should be used up to 200 times the MCP. Class 1 filters up to 1,000 ML/M3 (0.1%), Class 2 filters up to 5,000 ML/M3 (0.5%), depending on which limit is reached first. An AX-filter for low boiling points (organic compounds with a low boiling point below 65 °C). AX-filters should be fitted only to 3M full-face masks. A1 and A2 filters for organic vapours with a boiling point above 65 °C. * Only for full-face masks

STANDARDS

A GUIDE TO CHOOSING THE RIGHT MASK

series 6000 and 7500 can be combined with the following filters:

TYPE OF WORK		DEGREE OF PROTECTION	NOTES
acid etching	organic solvent dichloromethane	A1	units with a drive and air supply, where appropriate
	ammonia paint remover	A, B, E, K	units with a drive and air supply, where appropriate
welding	polyurethane coating	A, B, E, P3	-
	stainless steel	A,B, E, P3	if the electrode releases toxic, gaseous substances
coating	solvent-based lacquer	A2	-
	water-based lacquer (including residual solvents)	A1	-
spray painting	solvent-based lacquer, synthetic resin	A2, P2	-
	isocyanate containing lacquer	A2, P2	units with a drive and air supply, where appropriate
	pesticide (organic / volatile)	A2, P2	full-face mask, where appropriate
handling	sulfur dioxide	A, B, E	-
	acid salt	A, B, E	full-face mask for additional face protection
	liquid manure	A, B, E, K	-
	ammonia	K	full-face mask for additional face protection
	gasoline, nitrogen diluent	A2	-
	storage of hazardous goods, transportation	A, B, E, P3	-
bonding	adhesives containing solvents	A1	A2P2 when using sprayed adhesives

DEGREE OF PROTECTION

A against organic gases and vapours, e.g. organic solvents such as turpentine, gasoline, toluene, and xylene with a boiling point > 65 °C	B against inorganic gases and vapours, e.g. chlorine, bromine, hydrogen sulfide, etc.	E against acid gases and vapours, e.g. sulfur dioxide, hydrogen chloride, etc.	K against ammonia and organic compounds of ammonia, such as dimethylamine, etc.	AX against organic compounds with a low boiling point ≤ 65 °C
			HG against mercury	P1, P2, P3 against solid particles and aerosols

FFP1 – Protection against particles, solid and liquid aerosols. FFP1 filter class respirators provide effective protection if the permissible concentration of 4x NPK-P* is not exceeded.

FFP2 – Protection against particles, solid and liquid aerosols, mists and smoke. FFP2 filter class respirators may be used if the concentration of 10x NPK-P* is not exceeded.

FFP3 – Protection against particles, solid and liquid aerosols, mists and smoke, viruses, bacteria and spores. FFP3 filter class respirators may be used if the concentration does not exceed the permissible value of 40x NPK-P*.

Notes:

- 1: use a combination of filters
- 2: Combined filters SR 299-2 ABEK1 Hg P3 R and SR 599 A1BE2K1 Hg P3 R.Hg filter type – the maximum duration of use is 50 hours
- 3: Use a full face mask
- 4: Carcinogenic
- 5: Penetrates into the body and skin
- 6: Sensitizing substance

A compressed air system (cae) can be always used in place of masks with a filter. A compressed air system must be always used where the gas concentration exceeds 0.5% of the volume. It should also be used for physically demanding or long-running work. Compressed air supply systems should not be used where there is a risk of loss of consciousness or asphyxiation.

The SR 221 prefilter must always be used, but it NEVER replaces the P3 R SR 510 prefilter and particle filter.

These instructions are for information only. Details regarding the performance and limitations are listed on the packaging and in the user instructions. Before using any of these respirators, the user must read the instructions for each product and understand them; the relevant national legislation must be observed.

AP83001V

FFP2 four-layer folded respirator with exhalation valve - protects the respiratory system from solid particles, solid and liquid dust, smoke, bacteria, mold and aerosols.

SR 900

The half mask is equipped with two ventilation openings that ensure very low exhalation resistance. The ventilation openings are protected by covers that effectively protect the membranes against dust, mist and paint aerosols, while the easily adjustable elastic headbands are designed in a "V" shape loop to allow for a firm and comfortable attachment of the mask onto the back of your head. It can be used as a filtration device in combination with the SR 307 compressed air attachment or with the SR 951 hose and the SR 507 compressed air regulator as a breathing apparatus with continuous flow for connection to a compressed air supply. The package includes 1 holder for the SR 5153 pre-filter, 1 SR 221 pre-filter, 1 cleaning cloth.

SR 507

A compressed air regulator to be connected to a breathing hose, designed for use with the Sundström SR 520/ SR 530/ SR 561/ SR 562/ SR 540/ SR 590/ SR 580 headpieces; with these headpieces, the unit forms a respiration system with a drive (PAPR) or a supply of compressed air, designed specifically for use in workplaces with extreme contamination exceeding the maximum permitted concentrations of hazardous substances or harmful substances with poor diagnostic properties. Made of materials not susceptible to causing friction sparking, which allows using the system in combustible or flammable environments. A flow meter, warning whistle and control valve are included as part of the unit. Airflow into the head-piece is adjustable ranging from 175–260 l/min, working pressure of 5–7 bar (500–700 kPa), working temperatures from - 10 °C to + 50 °C, designed for connection to hoods SR 520/ SR 530/ SR 561/ SR 562, visors SR 570/ SR 540 EX, half mask SR 900, welding shield SR 590, helmet with visor SR 580 and welding shield/helmet with visor SR 584/ SR 580. With SR 359 meets the requirements of EN 14594:2055, Class 3B.

EN 352-2	Hearing protection. Safety requirements and testing. Part 2: Earplug hearing protectors
EN 352-3	Hearing protection - Safety requirements and tests. Part 3: Ear muffs for industrial safety helmets

EARZONE PRO C

MATERIAL	PU leather, Nylon, ABS, PU foam
ART. NO.	C4016
STANDARD	EN 352-1, EN 352-4, EN 352-6, EN 352-8
NOISE REDUCTION	32 dB

Smart electronic ear defenders with Bluetooth 5.3 technology. Connect to a mobile phone using the supplied 3.5 mm cable or via Bluetooth. Low power consumption and large 1000mAh battery for all-day wear, eliminating the risk of power loss while working and providing stable protection. Wide padded head arch for added comfort, easy length adjustment, soft memory foam for added protection without too much pressure on the ears.

EARZONE X601

MATERIAL ABS, neoprene, PU leather,
PU, stainless steel

ART. NO. C4012

STANDARD EN 352:1

NOISE REDUCTION 28 dB

Earmuffs with length adjustment, easy to adjust, adapts perfectly to the user, very comfortable thanks to extra soft memory foam ear padding, designed for long term wear. The ideal choice for environments with a medium-high noise level.

EARZONE X701

MATERIAL	ABS, neoprene, PU leather, PU, stainless steel
ART. NO.	C4013
STANDARD	EN 352:1
NOISE REDUCTION	36 dB

Earmuffs with adjustable length, very easy to adjust, perfectly adapts to the user. The wide padding made of soft plastic foam guarantees maximum user comfort and effective protection. Designed for long-term wear. The ideal choice for environments with extremely high noise levels.

EARZONE X801

MATERIAL	ABS, PUR-E, PP
ART. NO.	C4014
STANDARD	EN 352:3
NOISE REDUCTION	31 dB

Earmuffs with helmet attachment, universal 30mm slot, adjustable length, soft and very comfortable ear padding, slim design reduces the risk of entrapment in tight spaces. Ideal choice for environments with moderately high noise levels.

M10

MATERIAL ABS, PVC, Polyether, Stainless steel wire
ART. NO. C4010 – blue,
 C4011 – pink
STANDARD EN 352-1
NOISE REDUCTION 26 dB

Children's protective headphones effectively reduce external noise, protect children's hearing from dangerous sound levels. The headphones have an adjustable padded headband, are very comfortable, lightweight, and suitable for extended wear. Suitable for children from 2 to 16 years old.

Use: air shows, shooting ranges, amusement parks, concerts, car racing, outdoor chores, air travel

M40

MATERIAL	ABS, PVC
ART. NO.	C4006
STANDARD	EN 352-1
NOISE REDUCTION	32 dB

Earmuff hearing protector, ABS shells with PVC ear cushions, synthetic leather, a folding and adjustable headband, pocket model.

M51

MATERIAL	PU leather, EVA, PVC
ART. NO.	C4015
STANDARD	EN 352-1
NOISE REDUCTION	31 dB

Hearing protectors with adjustable headband length for a perfect fit and optimal protection.

*Replacement for M50

M60

MATERIAL	ABS, PVC
ART. NO.	C4007
STANDARD	EN 352-3
NOISE REDUCTION	21 dB

Earmuff hearing protector, ABS shells with PVC ear cushions, synthetic leather, with a helmet adapter.

M20

MATERIAL	ABS, PVC
ART. NO.	C4004
STANDARD	EN 352-1
NOISE REDUCTION	29 dB

Earmuff hearing protector, ABS shells with PVC ear cushions, synthetic leather, headband with three adjustment positions.

P201

MATERIAL	polyurethane foam
ART. NO.	C4003
STANDARD	EN 352-2
NOISE REDUCTION	28 dB

Pre-moulded reusable earplugs, three flanges, with a connection string, come in a box with a loop.

LASER LITE

MATERIAL	polyurethane foam
ART. NO.	C1048
STANDARD	EN 352-2
NOISE REDUCTION	35 dB

Earplugs made from polyurethane foam, The T-shape allows an easy fit and comfortable wearing.

LASER LITE C

MATERIAL	polyurethane foam
ART. NO.	C1072
STANDARD	EN 352-2
NOISE REDUCTION	35 dB

Earplug hearing protector made from pliant polyurethane foam, The T-shape allows an easy fit and comfortable wearing, with a connection string.

BILSOM 303S (small) BILSOM 303L (large)

MATERIAL	polyurethane foam
ART. NO.(small)	C1053
ART. NO.(large)	C1052
STANDARD	EN 352-2
NOISE REDUCTION	33 dB

Cone-shaped earplug hearing protector, LeightStripe™ technology: a mixture of yellow and white polyurethane foam, less pressure when worn for longer periods of time, smooth hygienic surface that is resistant to contamination.

MAX

MATERIAL	polyurethane foam
ART. NO.	C1050
STANDARD	EN 352-2
NOISE REDUCTION	37 dB

Earplug hearing protector made from soft flexible PU foam, extended bell shape for maximum comfort, easy fit, does not slip out of the ear canal.

FUSION DETECT

MATERIAL	FlexiFirm®, SoftFlanges™
ART. NO.	C1075
STANDARD	EN 352-2
NOISE REDUCTION	28 dB

Earplug hearing protector with a connecting cord, patented dual materials, FlexiFirm® handle for easy gripping ensures an easy fit into the external ear canal, SoftFlanges™ to ensure a comfortable seal and protection, with a metal ring for detection, bright blue colour, with a storage pouch, suitable for the food industry.

SMARTFIT C

MATERIAL	CMT
ART. NO.	C1071
STANDARD	EN 352-2
NOISE REDUCTION	30 dB

Earplug hearing protectors, patented CMT material: softens when heated to body temperature and the shape of the plug adapts to the shape of the user's ear canal, high level of comfort and individual adaptation, connection cord and storage pouch included.

SMARTFIT DETECT

MATERIAL	CMT
ART. NO.	C1076
STANDARD	EN 352-2
NOISE REDUCTION	30 dB

Earplug hearing protectors, patented CMT material: softens when heated to body temperature and the shape of the plug adapts to the shape of the user's ear canal, high level of comfort and individual adaptation, connection cord and storage pouch included, with a metal ring for detection, suitable for the food industry.

LASER TRAK DETECT

MATERIAL polyurethane foam
ART. NO. C1077
STANDARD EN 352-2
NOISE REDUCTION 35 dB

Easily visible and detectable earplugs with a connecting cord, for long-term comfortable wear, non-ferrous metal clamp, adaptable PU foam, The T-shape allows for an easy fit and comfortable wearing, smooth surface resistant to contamination, suitable for the food industry.

BILSOM 304S (small) BILSOM 304L (large)

MATERIAL polyurethane foam
ART. NO. (small) C1074
ART. NO. (large) C1073
STANDARD EN 352-2
NOISE REDUCTION 33 dB

Cone-shaped earplug hearing protector, LeightStripe™ technology: a mixture of yellow and white polyurethane foam, less pressure when worn for longer periods of time, smooth hygienic surface that is resistant to contamination, with a connection string.

LASER LITE REF

MATERIAL polyurethane foam
ART. NO.(200 pairs) C1049
ART. NO.(500 pairs) C1104
STANDARD EN 352-2
NOISE REDUCTION 30 dB

Refill for Bilsom earplug hearing protectors intended for the LS 400 and LS 500 dispensers.

BILSOM REF

MATERIAL polyurethane foam
ART. NO. size S (200 pairs) C1055
ART. NO. size L (200 pairs) C1054
ART. NO. size L (500 pairs) C1107
STANDARD EN 352-2
NOISE REDUCTION 33 dB

Refill for the Bilsom earplug hearing protectors for the LS 400, LS 500 dispensers.

LS 400 + 400 pairs LASER LITE

MATERIAL plastic
ART. NO. C1122

Lightweight earplug dispenser, may be attached to the wall or simply put on a pad, rotary knob for easy dispensing, with a basket that prevents the earplugs from falling onto the floor, fully transparent, can be refilled before it is completely empty, economic choice for dispensing hearing protectors.

LS 400 + 400 pairs BILSOM L

MATERIAL plastic
ART. NO.(small) C1123

Lightweight earplug dispenser, may be attached to the wall or simply put on a pad, rotary knob for easy dispensing, with a basket that prevents the earplugs from falling onto the floor, fully transparent, can be refilled before it is completely empty, economic choice for dispensing hearing protectors.

VERISHIELD VS 110

MATERIAL	stainless steel, PUR-E, PVC, fabric PC/PBT, ABS
ART. NO.	C1127
STANDARD	EN 352-1
NOISE REDUCTION	27 dB

Earmuffs with a padded headband, telescopically adjustable headband, unique noise attenuation system to the optimal level without increasing the weight and the size of earpieces, for versatile use.

VERISHIELD VS 120

MATERIAL	stainless steel, PUR-E, PVC, fabric, PC/PBT, ABS
ART. NO.	C1128
STANDARD	EN 352-1
NOISE REDUCTION	31 dB

Earmuffs with a padded headband, telescopically adjustable headband, patented air flow control system, a unique system of attenuating sound to the optimal level without the need to increase the weight or size of the earmuffs, for versatile use.

VERISHIELD VS 130

MATERIAL	stainless steel, PUR-E, PVC, fabric, PC/PBT, ABS
ART. NO.	C1129
STANDARD	EN 352-1
NOISE REDUCTION	35 dB

Earmuffs with a padded headband, telescopically adjustable headband, patented air flow control system, a unique system of attenuating sound to the optimal level without the need to increase the weight or size of the earmuffs, for versatile use.

VERISHIELD VS130DH

MATERIAL	ABS, PUR-E, PP
ART. NO.	C1085
STANDARD	EN 352-3
NOISE REDUCTION	27 dB

Earmuffs with a helmet attachment. Memory foam ear pads reduce pressure on the head and improve comfort. The Air Flow Control technology ensures optimum attenuation at all frequencies used. The surface of the earmuffs is resistant to oil and grease. Very light-weight thanks to the combination of ABS material and the special design of the inner partition.

VERISHIELD VS 110 H

MATERIAL	stainless steel, PUR-E, PVC, fabric, PC/PBT, ABS
ART. NO.	C1130
STANDARD	EN 352-3
NOISE REDUCTION	28 dB

Earmuff hearing protector that can be mounted to a helmet, patented air flow control system, a unique system of attenuating sound to the optimal level without the need to increase the weight or size of the earmuffs, a wide range of adapters for different types of helmets available.

IMPACT PRO INDUSTRIAL

MATERIAL	ABS, PUR-E, PP, fabric, stainless steel
ART. NO. (small)	C1120
STANDARD	EN 352-1
NOISE REDUCTION	33 dB

Howard Leight Impact Pro electronic hearing protection with sound amplification. A very high level of noise attenuation - SNR 33 dB. The earmuffs are ideal for environments with a high level of noise. The earmuffs use built-in microphones that amplify ambient sounds to 82dB, enhancing natural listening. They automatically attenuate sounds exceeding 82dB. An external audio jack allows you to connect the earmuffs to your phone or MP3 player.

EAR SOFT NEON

MATERIAL polyurethane
foam

ART. NO. C1001

STANDARD EN 352-2

NOISE REDUCTION 36 dB

Earplug hearing protector with a curved front, soft PU foam, low pressure on the ear canal.

EAR CLASSIC

MATERIAL PVC foam

ART. NO. C1003

STANDARD EN 352-2

NOISE REDUCTION 28 dB

Earplug hearing protectors, special PVC foam, shape memory allows for a gradual and perfect adhesion to the wall of the ear canal, does not irritate the skin, washable, easy and convenient to use.

EAR SOFT NEON C

MATERIAL polyurethane
foam, PVC

ART. NO. C1002

STANDARD EN 352-2

NOISE REDUCTION 36 dB

Earplug hearing protector with a curved front, soft PU foam, low pressure on the ear canal, with a connection string.

Plastic case

MATERIAL Polypropylene

ART. NO. C1115

Durable reusable storage case for safe and secure storage of 3M™ Ultrafit and 1271 reusable earplugs. The case features a belt clip for convenient storage and easy access. The clear design allows for quick visual inspection.

EAR EXPRESS POD

EAR EXPRESS POD with a lanyard

MATERIAL	polyurethane foam, PVC
ART. NO.	C1008
STANDARD	EN 352-2
NOISE REDUCTION	28 dB

Earplug hearing protectors, mushroom-shaped with a plastic handle for easy and hygienic fitting into the ear canal, washable, with a connection string.

EAR CABOFLEX

MATERIAL	vinyl, polymer
ART. NO.	C1015
STANDARD	EN 352-2
NOISE REDUCTION	21 dB

Earplug hearing protectors, fine foam polymer coated with a thin layer of silicone, lightweight connecting chin strap, allows the use of protective helmets and glasses, the earplugs are replaceable.

EAR SOFT NEON

MATERIAL	polyurethane foam
ART. NO.	C1047
STANDARD	EN 352-2
NOISE REDUCTION	36 dB

Refills for EAR SOFT NEON earplugs, 500 pairs in a bag.

EAR SOFT NEON

MATERIAL	polyurethane foam
ART. NO.	C1018
STANDARD	EN 352-2
NOISE REDUCTION	36 dB

Refills for EAR SOFT NEON earplugs, 500 pairs, reusable dispenser.

EAR SOFT NEON dispenser

MATERIAL	plastic
ART. NO.	C1017

EAR hearing protector dispenser, easy operation using just one hand, easily removable trays.

3M 1100

MATERIAL	polyurethane foam
ART. NO.	C1020
STANDARD	EN 352-2
NOISE REDUCTION	37 dB

Earplug hearing protector with a curved front part, soft hypoallergenic PU foam.

3M 1110

MATERIAL	polyurethane foam
ART. NO.	C1022
STANDARD	EN 352-2
NOISE REDUCTION	37 dB

Earplug hearing protector with a curved front, soft hypoallergenic PU foam with a connecting thread.

1310, 3M™ E-A-R™ Banded earplugs 1311, 3M™ E-A-R™ Replacement earplugs

MATERIAL	visco elastic foam
ART. NO.1310	C1025
ART. NO.1311	C1023
STANDARD	EN 352-2
NOISE REDUCTION	26 dB

Elegant earplugs with an innovative elastic coupling for optimal fit and maximum comfort, extremely lightweight. The foam earplugs are replaceable.

3M 1271

MATERIAL	monopren, polyester, acetate
ART. NO.	C1024
STANDARD	EN 352-1
NOISE REDUCTION	25 dB

Reusable earplug hearing protector, hypoallergenic monoprene, case with a belt clip, with a connection string.

EAR ULTRAFIT EARPLUGS

MATERIAL	thermoplastic elastomer
ART. NO.	C1119
STANDARD	EN 352-2
NOISE REDUCTION	32 dB

Soft and highly comfortable earplugs that fit most users. Easy to shape, washable and reusable. Suitable for demanding applications.

H510A-401-GU

MATERIAL	stainless steel wire, PVC, acetate, ABS, polyether
ART. NO.	C3001
STANDARD	EN 352-1
NOISE REDUCTION	27 dB

PELTOR®OPTIME I earmuffs, soft wide cushions helps reduce pressure around the ears and improves comfort and wearability, filled with a unique combination of liquid and foam, ideal for use in industrial environments with high noise levels and for outdoor use, when mowing the lawn or during free time activities, universal protection and low weight.

H510P3E-405-GU

MATERIAL	stainless steel wire, PVC, acetate, ABS, polyether
ART. NO.	C1045
STANDARD	EN 352-3
NOISE REDUCTION	26 dB

PELTOR®OPTIMUS I earmuff hearing protector that can be mounted to a helmet, cushions are filled with a unique combination of liquid and foam for an optimal seal and exerts low pressure at the point of contact, ideal for use in industrial environments with medium noise levels and for outdoor use, when mowing the lawn or during free time activities, universal protection and low weight.

H520A-407-GQ

MATERIAL	stainless steel wire, PVC, acetate, ABS, polyether
ART. NO.	C3002
STANDARD	EN 352-1
NOISE REDUCTION	31 dB

PELTOR®OPTIMUS II earmuff hearing protector with a headband, dampens even extremely low frequencies to a minimum, filled with a unique combination of liquid and foam for an optimal seal and exerts low pressure at the point of contact, the ideal choice for environments with high levels of industrial noise, for environments with construction equipment, airports or for agricultural work.

H540A-411-SV

MATERIAL	stainless steel wire, PVC, acetate, ABS, polyether
ART. NO.	C3003
STANDARD	EN 352-1
NOISE REDUCTION	34 dB

Highly effective PELTOR®OPTIME III earmuffs with a headband, developed for use in extremely noisy environments, the protection is based on the double casing technology that minimizes resonance if there is a mount to provide maximum high frequency dampening; the audio link between the internal volume and the volume between the earmuffs allows for maximum low-frequency dampening, combines effective protection and maximum comfort.

X Series X1P3

MATERIAL	stainless steel, PVC foil, ABS, PUR foam
ART. NO.	C3079
STANDARD	EN 352-3
NOISE REDUCTION	26 dB

3M™ PELTOR™ X1P3 X-Series Earmuffs are high performance earmuffs for light industrial applications that offer 26 (dB) attenuation in a modern, attractive and slim earcup design. Soft, wide sealing rings help reduce pressure on the ears and increase comfort. Slim earcups with spacious inside help minimize temperature and humidity rise. Lightweight construction (185 g).

X5A-SV

MATERIAL	stainless steel wire, TPE, polyester, polypropylen, acetate
ART. NO.	C3047
STANDARD	EN 352-1
NOISE REDUCTION	37 dB

Earmuffs with a headband, innovative technology that provides exceptionally high efficiency, specially moulded foam inside the muffs and inside the sealing cushions provides the optimal amount of dampening without requiring the use of double protection with additional hearing protectors, distinguished by their black colour, easy use in environments with exceptionally loud noise.

X4A-GB

MATERIAL	stainless steel wire, TPE, polyester, polypropylen, acetate
ART. NO.	C3045
STANDARD	EN 352-1
NOISE REDUCTION	37 dB

3M™ Peltor™ X4 earmuffs exceptionally slim and lightweight earmuffs guarantee excellent compatibility when used with other personal protective equipment 3M fluorescent yellow-green color ensures good visibility when working outdoors and thus helps improve safety newly specially shaped cushioning elements and innovative foam contained in the seal ring guarantee excellent acoustic protection especially against sounds with dominant low frequencies.

STANDARDS

EN 353-2	Personal fall protection equipment - Part 2: Guided type fall arresters including a flexible anchor line
EN 354	Personal protection equipment against falls from a height - Lanyards
EN 355	Personal protection equipment against falls from a height - Energy absorbers
EN 358	Personal protection equipment for work positioning and prevention of falls from a height - Belts for work positioning, and restraint and work positioning lanyards

ART. NO. I4029
STANDARD EN 355

Shock absorber, 35 mm wide strap, reduces the impact of a fall to less than 6 kN, 11 mm wide rope, length 1.5 m, abrasion resistant loops, stitching protected by a strong transparent sleeve.

USE:

FA 30 400 18

MATERIAL polyester, steel
ART. NO. I4012
STANDARD EN 355

Fall arrest with two straps, strap length 1.8 m, fall arrest width 35 mm, steel hooks at the end of the ropes with a 50.8 mm opening.

USE:

FA 30 304 18

MATERIAL polyester, steel
ART. NO. I4011
STANDARD EN 355

Fall arrest with a strap, strap length 1.8 m, fall arrest width 35 mm, each rope is finished with a hook with an 50.8 mm opening.

USE:

FA 40 909 20

ART. NO. I4444

SIZE 2 m

FA 40 909 40

ART. NO. I4472

SIZE 4 m

MATERIAL polyamide, aluminium

STANDARD EN 358:2018, EN 795:2012 Typ B, EN 795:2012 Typ C, EN 12841:2024 Typ A

SKALA – Positioning rope with adjustable feed

Can also be wrapped around a structure to serve as an anchoring loop (EN 795:2012 Type B) or as a temporary horizontal support (EN 795:2012 Type C) by tensioning between two anchor points (EN 795) using the 2 supplied couplings. Maximum length: 2 m. Weight: 0.75 kg Couplings: 1 aluminium carabiner with quarter-turn lock and safety pin, 1 aluminium hook FA 50 229 25B, aluminium sliding regulator with polymer cover for smooth adjustment and longer life, end knot protected by transparent sleeve.

FA 40 906 50

MATERIAL polyester, aluminium

ART. NO. I4141

STANDARD EN 358:2018, EN 795:2012 Typ B, EN 795:2012 Typ C

Working braided positioning rope 12 mm diameter with adjustable grip, abrasion-resistant eyelet that protects the loops from damage caused by contact with metal, stitching protected by a thick transparent cover that not only protects the end of the rope but also makes the stitches visible so they are easy to check before use, aluminium regulator for gradual rope movement adjustment, maximum length: 5 metres, 1 steel carabiner with screw lock FA 50 101 17 and 1 aluminium carabiner with spring lock FA 50 229 25.

FA 40 500 15

MATERIAL polyamide
ART. NO. I4007
STANDARD EN 354

Three-strand positioning rope with a wear indicator, polyamide, 12 mm diameter, minimum breaking strength 22 kN, 1.5 m total length, thimble eyes at each end.

USE:

FA 40 600 15

MATERIAL polyamide, steel
ART. NO. I4090
STANDARD EN 354

A connector with two ropes, length 1.5 m, 2 steel hooks, weight 1.53 kg.

FA 40 502 10

MATERIAL polyamide
ART. NO. I4031
STANDARD EN 354

Lanyard, polyamide rope, 12 mm diameter, length of 1 m, the eyes are protected against metal objects, stitching protected by a strong transparent sleeve, steel hook on one end, opening 50,8 mm.

USE:

FA 40 900 20

MATERIAL polyamide
ART. NO. I4008
STANDARD EN 354

Adjustable lanyard, three-strand rope with a wear indicator, polyamide, 14 mm diameter, ends with a snap hook and a steel hook, alloy steel ring adjuster maximum length 2 m.

USE:

FA 40 903 20

MATERIAL polyamide, steel
ART. NO. I4021
STANDARD EN 358

Adjustable positioning lanyard, polyamide rope, 12 mm, maximal length 2 m, light alloy adjuster for adjusting the rope length, rope protection, for work that requires a stable working position.

USE:

FA 60 006 10 1m

FA 60 006 20 2m

MATERIAL steel
ART. NO. I4055, I4056
STANDARD EN 795

Anchorage steel wire rope, width 8 mm, length 1 m (I4055), 2 m (I4056).

USE:

FA 60 005 15

MATERIAL polyamide
ART. NO. I4022
STANDARD EN 795

Polyamide webbing, the webbing ends are sewn together and create a closed-loop, length 1.5 m, may be used as an anchorage to connect a fall arrester to a structural anchor point, minimum resistance of 22 kN.

USE:

FA 60 005 12

MATERIAL polyamide
ART. NO. I4115
STANDARD EN 795

Polyamide webbing, the webbing ends are sewn together and create a closed-loop, length 1,2 m, may be used as an anchorage to connect a fall arrester to a structural anchor point, minimum resistance of 22 kN.

USE:

FA 60 005 08

MATERIAL polyamide
ART. NO. I4070
STANDARD EN 795

Polyamide webbing, the webbing ends are sewn together and create a closed-loop, length 0,8 m, may be used as an anchorage to connect a fall arrester to a structural anchor point, minimum resistance of 22 kN.

USE:

FA 20 102 10

MATERIAL polyester, polyamide, steel
ART. NO. I4027
STANDARD EN 353-2

Guided type fall arrester on kernmantle rope, rope in combination with a shock absorber, rope length 10 m, diameter: 12 mm, ring for anchoring on one end and a knot on the other end.

USE:

5

FA 20 102 20

MATERIAL polyester, polyamide, steel
ART. NO. I4068
STANDARD EN 353-2

Guided type fall arrester on kernmantle rope, rope in combination with a shock absorber, rope length 20 m, diameter: 12 mm, ring for anchoring on one end and a knot on the other end.

USE:

5

FA 20 103 10

STANDARD EN 353-2, 358
ART. NO. I4138
LENGTH 10 m

Braided rope, 11 mm diameter.

FA 20 103 20

STANDARD EN 353-2, 358
ART. NO. I4139
LENGTH 20 m

Braided rope, 11 mm diameter.

FA 20 103 30

STANDARD EN 353-2, 358
ART. NO. I4271
LENGTH 30 m

Braided rope, 11 mm diameter.

USE:

3

5

FA 20 103 00A

MATERIAL polyester, polyamide, steel
ART. NO. I4124
STANDARD EN 353-2

A guided fall arrester for 11 mm diameter ropes that can be locked for work positioning.

USE:

3

5

FA 20 503 02

MATERIAL polymer, polyester, steel
ART. NO. I4210
STANDARD EN 360

Retractable fall arrester, a polymer case, 2m strap length, certified for horizontal use and a fall factor of 2, Maximum user weight 140kg for vertical movement, 100kg for horizontal movement.

**USE:****FA 20 502 02**

MATERIAL polymer, polyester, steel
ART. NO. I4188
STANDARD EN 360

Retractable fall arrester, a polymer case, 2m strap length, certified for horizontal use and a fall factor of 2, Maximum user weight 140kg for vertical movement, 100kg for horizontal movement.

**USE:****FA 20 503 01**

MATERIAL polymer, polyester, steel
ART. NO. I4333
STANDARD EN360:2002, DIN 19427:2017

Retractable fall arrester, polymer casing, 1.75m strap, tested to fall over a double edge. Certified for working on platforms according to DIN 19427:2017.

**USE:****FA 20 504 06**

MATERIAL polymer, polyester, steel
ART. NO. I4305
STANDARD EN 360

Retractable fall arrester, polymer case, 6 m strap, sharp edge tested, certified for vertical and horizontal use.

**USE:****FA 20 300 02**

MATERIAL polymer, polyester, steel
ART. NO. I4014
STANDARD EN 360

Retractable fall arrest with a steel snap hook, total length 2.5 m, fall arrest 50 mm wide, integrated shock absorber, 1 snap-hook and a hook with a fall indicator, enables the maximum freedom of movement, security and convenience when working on slopes, rooftops and indoors, weighs 1.2 kg.

**USE:**

Fall factor 2

**FA 20 302 02**

MATERIAL steel
ART. NO. I4028
STANDARD EN 795

Retractable fall arrest with a steel snap hook, total length 2 m, fall arrest 50 mm wide, integrated shock absorber and a steel hook, fall indicator, rotary suspension of the retractable fall arrester, tested with fall factor 2 (maximum length of 1.8 m), allows for the maximum freedom of movement, safety and comfort when working on slopes, rooftops and in closed spaces.

**USE:**

FA 20 402 03

MATERIAL polymer, polyester, steel
ART. NO. I4269
STANDARD EN 360

Retractable fall arrest, a 3 m steel rope, certified for horizontal use / vertical use, tested with a fall over a sharp edge, weights 1.99 kg.

USE:

FA 20 402 07

MATERIAL polymer, polyester, steel
ART. NO. I4270
STANDARD EN 360

Retractable fall arrest, a 7 m steel rope, certified for horizontal use / vertical use, tested with a fall over a sharp edge, weights 3.53 kg.

USE:

FA 20 402 10

MATERIAL polymer, polyester, steel
ART. NO. I4235
STANDARD EN 360

Retractable fall arrest, a 10 m steel rope, certified for horizontal use / vertical use, tested with a fall over a sharp edge, weights 4.57 kg.

USE:

FA 20 402 03 B

MATERIAL polymer, polyester, steel
ART. NO. I4339
STANDARD EN 360

Retractable fall arrest, a 3 m steel rope, vertical use, weights 1.99 kg.

USE:

FA 20 402 10 B

MATERIAL polymer, polyester, steel
ART. NO. I4304
STANDARD EN 360

Retractable fall arrest, a 10 m steel rope, vertical use, weights 4,27 kg.

USE:

FA 20 402 15 B

MATERIAL polymer, polyester, steel
ART. NO. I4309
STANDARD EN 360

Retractable fall arrest, a 15 m steel rope, vertical use, weights 7,03 kg.

USE:

FA 50 101 17

MATERIAL steel
ART. NO. I4005
STANDARD EN 362 level B

Manual snap hook with screw lock, steel, 10 mm diameter, gate opening 18 mm, minimum breaking strength 25 kN, weight 160 g, to be used for anchoring or for connecting to construction.

USE:

FA 50 301 23

MATERIAL steel
ART. NO. I4041
STANDARD EN 362

Triple-locking snap hook, opening 23 mm, strength 25 kN, weights 240 g.

USE:

FA 50 207 55

MATERIAL steel
ART. NO. I4062
STANDARD EN 362

Scaffolding hook, opening 50,8 mm, strength 23 kN.

USE:

FA 60 001 00

MATERIAL steel, aluminium
ART. NO. I4032
STANDARD EN 795

An anchor tripod suitable for access in tight spaces, 2 built-in pulleys on top of the tripod, 2 anchor loops on top of the tripod, adjustable tripod height 1.15 m — 2.15 m, base perimeter 1.08– 1.62m, weights 13 kg, maximum load 500 kg, complies with EN 795:2012 type B, EN 1808, ATEX.

USE:

6

FA 60 003 20

MATERIAL steel
ART. NO. I4033
STANDARD EN 1496, EN 13157

Rescue and work winch for the tripod, a 20 m long steel rope, a lift capacity of 125 kg, a maximum load of 250 kg, complies with EN 1496:2017 type A, EN 13157:2004, ATEX.

USE:

6

FA 20 401 20

MATERIAL steel, polymer
ART. NO. I4140
STANDARD EN 360, EN 1496

Retractable fall arrest with an integrated winch, a 20 m long steel rope, weights 9.2 kg, certified for users up to 140 kg, complies with EN360:2002, EN1496:2017 type B, ATEX.

USE:

6

FA 60 001 03

MATERIAL steel
ART. NO. I4187
STANDARD EN 12278, EN 362

Anchorage for the FA 20 401 20 tripod, complies with EN12278, EN362.

USE:

6

FA 80 104 01

MATERIAL polyamide, aluminium

ART. NO. I4354

STANDARD EN 361, EN 353, EN 362

Kit for work on pitched roofs. The set includes a full-body catching harness FA 10 203 00, a mobile fall arrester on a 15 m braided rope FA 20 102 15, a 2 m anchoring strap FA 60 005 20, and a steel carabiner FA 50 101 17.

USE:

5

FA 80 001 00

MATERIAL polyester, polyamide, steel
ART. NO. I4034
STANDARD EN 361, EN 356, EN 362

Restraint kit, includes a transport bag, FA 10 103 00 full body harness , FA 40 100 15 lanyard, two snap hooks FA 50 101 17, intended for work with zero risk of falling.

USE:

4

FA 80 108 00

MATERIAL polyester, polyamid, steel
ART. NO. I4277
STANDARD EN 361, EN 355

A comfortable set suitable for work on work platforms; the set Includes: FA 20 502 02 retractable fall arrester, FA 10 105 00A harness, FA 60 005 12 anchor loop.

USE:

1 4

FA 80 005 00

MATERIAL polyester, polyamide, steel
ART. NO. I4035
STANDARD EN 361, EN 355

Kit for work on ferrous structures, includes a transport bag, FA 10 104 00 full body harness, lanyard with a shock absorber and two FA 30 600 15 hooks, indispensable kit for work where the worker is changing positions and it is necessary to fasten and unfasten frequently.

USE:

1 4

FA 80 105 00

MATERIAL polyester, polyamide, steel
ART. NO. I4284
STANDARD EN 361, EN 353, EN 362

A kit for work on roofs, the set includes a transport bag, the FA 10 105 00 full-body harness, the FA 20 103 10 static rope (10 m), the FA 20 103 00 fall arrester that can be locked for work positioning.

USE:

5

FA 10 305 01

MATERIAL polyester, steel
ART. NO. 14421
STANDARD EN 361

Adventure – Harness and backpack in one. Harness equipped with automatic buckles, 1 back and 1 chest anchor point, maximum user weight 140 kg. Size M-L.

Our innovative design incorporates extremely breathable materials to keep you comfortable all day long, no matter how high up you are.

Reflective elements – For added safety in low light conditions. This product features reflective elements to keep you visible and safe.

Large pocket - Need to carry extra equipment or personal items? The product has a spacious pocket for everything you need to take with you.

Waterproof – Don't let the weather hold you back. The product is waterproof and protects your gear.

FA 90 101 00

MATERIAL Oxford polyester 600 x 600D
ART. NO. I4037
STANDARD EN 361, EN 356, EN 362

Durable universal backpack, 3 separate storage sections, padded back, shoulders and bottom of the backpack, carrier strap, dimensions: 45 x 36 x 18 cm, volume 26 l, for transporting and carrying work equipment at heights.

**FA 90 107 00**

MATERIAL PVC
ART. NO. I4105
STANDARD EN 361, EN 356, EN 362

Transport bag, dimensions: 62 x 32 cm, volume 49 l, designed for equipment up to 15 kg.

**FA 90 103 00**

MATERIAL Oxford polyester 600 x 600D
ART. NO. I4038

Travel bag, solid bottom made of polyethylene, carrier strap, dimensions: 60 x 19 x 26 cm, volume 29 l, for transporting and carrying work equipment at heights.

**FA 90 105 00**

MATERIAL PVC
ART. NO. I4052

Waterproof transport bag, solid bottom made of polyethylene, carrier strap, dimensions: 29 x 62 cm, volume 41 l, for transporting and carrying work equipment at heights.
