MATERIAL	
Shell fabric	100% wool merino
GRAMMAGE	200 g/m^2
SIZE	S – 2XL

TECHNICAL DATA SHEET

DESCRIPTION

This women's functional turtleneck, made from 100% merino wool and tailored to flatter the female figure, is designed as a highly comfortable base layer for year-round use. The very fine merino fibre ensures exceptional softness, eliminates any sensation of skin irritation and provides optimal thermal comfort even during prolonged use. The turtleneck collar increases protection around the neck and contributes to better thermal stability. The material naturally regulates body temperature – it insulates in the cold and effectively wicks away excess heat during higher activity. Moisture is absorbed into the fibre structure, keeping the surface dry and maintaining its insulating properties even when damp. Compared to synthetic fibres, merino wool is highly breathable, naturally antibacterial and long-lasting in its resistance to odours, which reduces the need for frequent washing. Thanks to its high-quality natural material with natural thermoregulation and timeless design, this model is suitable for year-round use across all seasons, in various climatic conditions and at different activity levels.

This personal protective equipment is in conformity with the requirements of the following harmonised standard:

ČSN EN ISO 13688:2014/A1:2022 – Protective clothing – General requirements

The service life depends on the rate of use and the rate of wear in the given conditions. Inapropriate storage conditions, improper maintenance and care reduce the service life. The warranty period is 24 months. Under no circumstances should the warranty period be confused with the service lefe of the product. With Intensive use, the service life may be shorter than the warranty provided.

The product does not contain any substances in concentrations that are known or suspected to have an adverse effect on the user´s hygiene of health. However, skin irritation is not impossible for sensitive people, in which case do not continue to use the garment. Avoid the fire and sources of intense heat. No accessories or replacement pants are intended for these garments. If the garment is not in use, it Is recommended to store it in a dry and well-ventilated area away from direct Sunlight. Transport best in original packaging, protect from moisture and extreme temperatures. At the end of its life cycle, dispose of the product in accordance with local waste management regulations.
